Further generalization of the notion of relatively prime ideals. *Bull. Calcutta Math. Soc.* 39, 143-146 (1947). (I. S. Cohen) 10-6.

A new proof of an inequality of Hardy-Littlewood-Pólya. *Mat. Tidsskr. B.* 1947, 53-54 (1947). (Beckenbach) 9-501.

On relatively primary ideals. *Norske Vid. Selsk. Forh., Trondhjem* 20, no. 7, 25-28 (1947). (I. S. Cohen) 10-6.

A theorem on the relative norm of an ideal. *Comment. Math. Helv.* 21, 29-43 (1948). (Todd-Tausky) 9-336.

Domaines d'intégrité où tout idéal est quasi primaire. *C. R. Acad. Sci. Paris* 226, 1660-1662 (1948). (I. S. Cohen) 9-490.

A note on half-prime ideals. *Norske Vid. Selsk. Forh., Trondhjem* 20, no. 28, 112-114 (1948). (I. S. Cohen) 11-310.

A condition under which an irreducible ideal is primary. *Quart. J. Math., Oxford Ser.* 19, 235-237 (1948). (I. S. Cohen) 10-280.

Some theorems on algebraic rings. *Acta Math.* 81, 285-289 (1949). (Samuel) 11-310.

The extension of the notion "relatively prime." *Acta Univ. Szeged. Sect. Sci. Math.* 13, 43-47 (1949). (I. S. Cohen) 10-675.

Über die Ideale arithmetischer Ringe. *Comment. Math. Helv.* 23, 334-341 (1949). (I. S. Cohen) 11-310.

Absolutes in partially ordered groups. *Nederl. Akad. Wetensch.* 52, 251-255 = *Indagationes Math.* 11, 66-70 (1949). (Clifford) 11-9.

A note on the descending chain condition. *Norske Vid. Selsk. Forh., Trondheim* 21, no. 14, 57-59 (1949). (Samuel) 11-638.

On a special property of the principal components of an ideal. *Norske Vid. Selsk. Forh., Trondheim* 22, no. 9, 28-30 (1949). (Samuel) 11-638.

The extension of partially ordered groups. *Acta Math. Acad. Sci. Hungar.* 1, 118-124 (1950). (English. Russian summary) (Nachbin) 13-436.

On mean systems. *Acta Math. Acad. Sci. Hungar.* 1, 303-320 (1950). (English. Russian summary) (Beckenbach) 13-922.

The meet-decomposition of elements in lattice-ordered semi-groups. *Acta Sci. Math. Szeged* 12, Leopoldo Fejér et Frederico Riesz LXX annos natis dedicatus, Pars A, 105-111 (1950). (Birkhoff) 12-237.

On the extension of the partial order of groups. *Amer. J. Math.* 72, 191-194 (1950). (Clifford) 11-323.

On partially ordered groups. *Nederl. Akad. Wetensch., Proc.* 53, 828-834 = *Indagationes Math.* 12, 272-278 (1950). (Birkhoff) 12-10.

On primal ideals. *Proc. Amer. Math. Soc.* 1, 1-6 (1950). (Samuel) 11-310.

A note on the idealizer of a subring. *Publ. Math. Debrecen* 1, 160-161 (1950). (Dieudonné) 12-6.

On semigroups admitting relative inverses and having minimal ideals. *Publ. Math. Debrecen* 1, 227-231 (1950). (Rees) 12-473.

The generalization of the valuation theory. *Duke Math. J.* 18, 19-26 (1951). (Moysls) 12-669.

On a new type of radical. *Comptes Rendus du Premier Congrès des Mathématiciens Hongrois*, 27 Août - 2 Septembre 1950, pp. 435-443. *Akadémiai Kiadó, Budapest*, 1952. (Hungarian. Russian and English summaries) (Kaplansky) 15-5.

On subdirect unions. I. *Acta Math. Acad. Sci. Hungar.* 3, 103-120 (1952). (Russian summary) (Hirsch) 14-612.

The direct sum of cyclic groups. *Acta Math. Acad. Sci. Hungar.* 3, 177-195 (1952). (Russian summary) (Hirsch) 14-945.

A remark on the Jacobson radical. *Acta Sci. Math. Szeged* 14, 167-168 (1952). (Zelinsky) 13-903.

Rédeian skew product of operator groups. *Acta Sci. Math. Szeged* 14, 228-238 (1952). (Hirsch) 14-723.

The Zappa extension of partially ordered groups. *Nederl. Akad. Wetensch. Proc. Ser. A* 55 = *Indagationes Math.* 14, 363-368 (1952). (Hirsch) 14-446.

On the structure of abelian p -groups. *Acta Math. Acad. Sci. Hungar.* 4, 267-288 (1953). (Russian summary) (Kaplansky) 15-682.

On a special kind of duality in group theory. II. *Acta Math. Acad. Sci. Hungar.* 4, 299-314 (1953). (Russian summary) (Kaplansky) 15-682.

On abelian groups in which the classes of isomorphic proper subgroups contain the same number of subgroups. *Čechoslovak. Mat. Z.* 2(77) (1952), 387-390 (1953). (Russian summary) (Haimo) 15-682.

On algebraic systems in which an operation taking mean values is defined. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közleményei* 3, 27-35 (1953). (Hungarian) (Erdős) 15-203.

Über die Zerlegung einer Gruppe nach zwei Untergruppen. *Monatsh. Math.* 57, 109-112 (1953). (D. G. Higman) 15-504.

A simple proof of the basis theorem for finite abelian groups. *Norske Vid. Selsk. Forh., Trondheim* 25 (1952), 117-118 (1953). (Haimo) 14-1058.

On the fundamental theorem of commutative ideal theory. *Acta Math. Acad. Sci. Hungar.* 5, 95-99 (1954). (Russian summary) (Herstein) 16-5.

On a property of basic subgroups. *Acta Math. Acad. Sci. Hungar.* 5, 143-144 (1954). (Russian summary) (Kaplansky) 16-9.

A lattice-theoretic discussion of some problems in additive ideal theory. *Acta Math. Acad. Sci. Hungar.* 5, 299-313 (1954). (Russian summary) (J. Levitzki) 16-991.

On the principal theorem of ideal theory. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 3, 87-95 (1954). (Hungarian) 16-441.

On a new type of radical. *Acta Sci. Math. Szeged* 16, 43-53 (1955). (J. Levitzki) 17-8.

On results of Hungarian research in the theory of infinite groups. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 5, 327-341 (1955). (Hungarian) 17-233.

Life and works of Tibor Selez, 1918-1955. *Mat. Lapok* 6 (1955), 97-129. (Hungarian. Russian and English summaries) 17-446.

On groups with finite classes of isomorphic subgroups. *Publ. Math. Debrecen* 3 (1954), 243-252 (1955). (F. Haimo) 17-233.

Über die Strukturfrage der unendlichen abelschen Gruppen. *Wiss. Z. Humboldt-Univ. Berlin. Math.-Nat. Reihe* 4 (1955), 91-95. 17-233.

On abelian torsion groups which can not be represented as the direct sum of a given cardinal number of components. *Acta Math. Acad. Sci. Hungar.* 7 (1956), 115-124. (Russian summary) (I. Kaplansky) 18-12.

On a useful lemma for abelian groups. *Acta Sci. Math. Szeged* 17 (1956), 134-138. (F. Haimo) 18-640.

Ringe und ihre additive Gruppe. *Publ. Math. Debrecen* 4 (1956), 488-508. (A. Kertész) 18-188.

On a directly indecomposable abelian group of power greater than continuum. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 453-454. (F. B. Wright) 20 #4590.

Über das Tensorprodukt von Torsionsgruppen. *Acta Sci. Math. Szeged* 18 (1957), 29-32. (F. B. Wright) 19-633.

On quasi nil groups. *Acta Sci. Math. Szeged* 18 (1957), 33-43. (F. B. Wright) 19-633.

Wann folgt die Maximalbedingung aus der Minimalbedingung? *Arch. Math.* 8 (1957), 317-319. (K. G. Wolfson) 19-938.

Über universale homomorphe Bilder und universale Untergruppen von abelschen Gruppen. *Publ. Math. Debrecen* 5 (1957), 185-196. (D. K. Harrison) 19-728.

On generalized pure subgroups of abelian groups. *Ann. Univ. Sci. Budapest. Eötvös. Sect. Math.* 1 (1958), 41-47. (F. Haimo) 20 #6459.

Ein kombinatorisches Problem bezüglich abelscher Gruppen. *Math. Nachr.* 18 (1958), 292-297. (Marshall Hall, Jr.) 20 #4501.

On the possibility of extending Hájós' theorem to infinite abelian groups. *Publ. Math. Debrecen* 5 (1958), 338-347. (D. K. Harrison) 20 #7058.

- Note on ordered groups and rings. *Fund. Math.* 46 (1959), 167-174. (R. S. Pierce) 20 #7069.
- and Szele, T.
Contribution to the theory of semisimple rings. *Acta Math. Acad. Sci. Hungar.* 3, 233-239 (1952). (Russian summary) (Henriksen) 14-719, 1278.
Abelian groups with a single maximal subgroup. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 5 (1955), 387-389. (Hungarian) (A. Kertész) 17-708.
- Kertész, A.; and Szele, T.
On a special kind of duality in group theory. I. *Acta Math. Acad. Sci. Hungar.* 4, 169-178 (1953). (Russian summary) (Baer) 15-287.
Abelian groups in which every serving subgroup is a direct summand. *Publ. Math. Debrecen* 3 (1953), 95-105 (1954). (Haimo) 15-775.
On abelian groups whose subgroups are endomorphic images. *Acta Sci. Math. Szeged* 16, 77-88 (1955). (I. Kaplansky) 16-1086.
On abelian groups in which every homomorphic image can be imbedded. *Acta Math. Acad. Sci. Hungar.* 7 (1956), 467-475. (Russian summary) (F. Haimo) 19-12.
- Fuchs, Robert A.
On the theory of short-crested oscillatory waves. *Gravity Waves*, pp. 187-200. National Bureau of Standards Circular 521, U. S. Government Printing Office, Washington, D. C., 1952. (Wehausen) 14-1028.

García, Godofredo.

General solution of the ballistic problem, taking into account the corrections for the sphericity of the planet, the density of the medium, gravity and the effect of the wind. *Revista Ci.*, Lima 41, 309-337 (1939) = *Actas Acad. Ci.* Lima 2, 107-135 (1939). (1 plate) (Spanish) 1-182.

The influence of the rotation of the planet on the movement of a projectile in a resisting medium. *Revista Ci.*, Lima 41, 339-348 (1939) = *Actas Acad. Ci.* Lima 2, 137-146 (1939). (1 plate) (Spanish) 1-182.

Sur le mouvement gyroscopique du projectile. *Actas Acad. Ci.* Lima 3, 31-36 (1940). (Scheffe) 2-28.

Équations générales du mouvement pendulaire des projectiles. *Actas Acad. Ci.* Lima 3, 49-54 (1940). (Scheffe) 2-28.

Differential equations of the movement of the center of gravity of a projectile in the space, taking into account the forces acting on the movement around the center of gravity. Deviation of the projectile. *Actas Acad. Ci.* Lima 3, 65-69 (1940). (Spanish) 2-172.

Reduction of the oscillation equations of a projectile to Volterra's equation of second order. *Actas Acad. Ci.* Lima 3, 84-90 (1940). (Spanish) (Moulton) 3-120.

Le problème général de la balistique extérieure. *Bull. Sci. Math.* (2) 64, 82-102 (1940). (Moulton) 2-28.

Reduction of the pendular equations to V. Volterra's equation of the second kind. *Pont. Acad. Sci. Acta* 4, 147-152 (1940). (Spanish) (MacColl) 10-159.

The general problem of exterior ballistics. *Revista Ci.*, Lima 42, 367-406 (1940). (Spanish) 2-28.

Mouvement des projectiles autour de son centre de gravité. Sur le mouvement gyroscopique; mouvement pendulaire des projectiles; dérivation. *Revista Ci.*, Lima 42, 541-685 (1940). (Milne) 2-269.

On the parametric representation of elastic (seismic) waves in anisotropic media in a hexagonal crystalline system (with transversal isotropy, internal waves). *Actas Acad. Ci.* Lima 4, 125-144 (1941). (1 plate). (Spanish) 3-287.

On the propagation of the seismic waves of Mr. C. Somigliana in media having properties of a cubic crystalline system. *Revista Ci.*, Lima 43, 271-290 (1941) = *Actas Acad. Ci.* Lima 4, 53-72 (1941). (Spanish) (Reissner) 3-27.

Parametric representation of elastic (seismic) waves in anisotropic media in a hexagonal crystalline system (form of the surface waves of Lord Rayleigh which diminish with depth). *Revista Ci.*, Lima 43, 545-566 (1941) = *Actas Acad. Ci.* Lima 4, 191-212 (1941). (Spanish) 3-287.

Lord Rayleigh's theory of seismic waves in a crystalline medium of the cubic system. *Univ. Nac. La Plata, Publ. Fac. Ci. Fisicomat. Serie 2: Revista* 6, 49-62 (1941). (Spanish) 2-333.

On the gyroscopic effect in the motion of a projectile. *Actas Acad. Ci.* Lima 5, 79-86 (1942). (Spanish) (W. E. Milne) 4-225.

On the regularization of the plane problem of three bodies. *Actas Acad. Ci.* Lima 5, 101-113 (1942). (Spanish) (Kaplan) 4-174.

On a new form of the inequalities of K. Sundman in the problem of three bodies. *Actas Acad. Ci.* Lima 5, 117-121 (1942). (Spanish) (Kaplan) 4-174.

Generalization of the formula of Lagrange. —Generalization of Sundman's inequality, deduced from the homogeneity of the potential and Birkhoff's auxiliary function for the problems of n bodies and of infinitely many bodies (gravitational or nebulous gas). *Actas Acad. Ci.* Lima 5, 132-144 (1942). (Spanish) (Kaplan) 4-174.

Generalization of Sundman's fundamental equality to the case of more than three bodies. *Proc. Nat. Acad. Sci. U.S.A.* 28, 425-427 (1942). (Kaplan) 4-57.

Generalization of the inequality of Sundman to the case of more than three bodies and to the case of a gravitational gas. *Proc. Nat. Acad. Sci. U.S.A.* 28, 428-432 (1942). (Kaplan) 4-57.

The three-body problem. *Revista Ci.*, Lima 44, 159-186 (1942). (Spanish) (Kaplan) 4-57.

The scientific work of Professor George D. Birkhoff. *Revista Ci.*, Lima 44, 187-232 (1942). (Spanish) 4-65.

On the problem of n bodies and the motion of a gravitational gas (or a nebulous one). *Revista Ci.*, Lima 44, 457-469 (1942). (Spanish) (Kaplan) 4-174.

On the regularization of the two dimensional three-body problem. *Revista Ci.*, Lima 44, 471-483 (1942). (Spanish) 5-17.

On a generalization of a new inequality derived from K. Sundman's auxiliary function in the problem of three bodies generalized by George D. Birkhoff. *Actas Acad. Ci.* Lima 6, 3-11 (1943). (Spanish) (Kaplan) 4-174.

On the regularization of two dimensional three-body problem. *Publ. Inst. Mat. Univ. Nac. Litoral* 5, 221-230 (1943). (Spanish) 6-75, 334, 7-620.

Generalization of the formula of Lagrange. Generalization of Sundman's inequality, deduced from the homogeneity of the potential and Birkhoff's auxiliary function for the problems of n bodies and of infinitely many bodies (gravitational or nebulous gas). *Revista Ci.*, Lima 45, 3-15 (1943). (Spanish) 5-17.

On the regularization of the two dimensional three-body problem. I. *Revista Ci.*, Lima 45, 53-90 (1943). (Spanish) (Kaplan) 5-17.

On the regularization of the two dimensional three-body problem. II. Expansion into a series of the regularizing coordinates and of the time as a function of the auxiliary variable of K. Sundman and T. Levi-Civita. *Revista Ci.*, Lima 45, 91-133 (1943). (Spanish) (Kaplan) 5-17.

On the regularization of the two dimensional three-body problem. III. Conditions for collision in the three-body problem. *Revista Ci.*, Lima 45, 9 pp. (1943). (Spanish) (Kaplan) 5-17.

On the regularization of the two dimensional three-body problem. IV. Analytic continuation beyond the collision of two of the bodies. Orbits in the neighborhood of a collision of two of the bodies. *Revista Ci.*, Lima 45, 13 pp. (1943). (Spanish) (Kaplan) 5-17.

Motion of a continuous system under the influence of gravitation only. Application to nebulae. *Revista Ci.*, Lima 45, 463-483 (1943). = *Actas Acad. Ci.* Lima 6, 135-155 (1943). (Spanish) (Kaplan) 5-191.

On the actual state of the solar system. New dissipative forces acting in addition to universal gravitation. The problem of three bodies within a dissipative system. *Actas Acad. Ci.* Lima 7, 10 pp. (1944). (Spanish) 6-75.

On the integration of the complete equation of diffusion and its application to the study of cells. *Actas Acad. Ci.* Lima 7, 255-287 (1944). (Spanish) 6-240.

On the present state of the solar system. New dissipative forces acting in addition to universal gravitation. The problem of three bodies within a dissipative system. *Actas Acad. Ci.* Lima 7, 351-360, 361-367 (1944). (Spanish) 6-190.

On the present state of the solar system. *Actas Acad. Ci.* Lima 7, 409-422 (1944). (Spanish) (Kaplan) 6-190.

Generalization of the Lagrange-Birkhoff inequality for a dissipative system in an approximately Newtonian field. *Actas Acad. Ci.* Lima 7, 431-434 (1944). (Spanish) (Kaplan) 7-92.

Celestial mechanics and its evolution. *Revista Ci.*, Lima 45, 145-164 (1944). (Spanish) 6-75.

Generalization of the theory of the virial. *Revista Ci.*, Lima 45, 281-292 (1944) = *Actas Acad. Ci.* Lima 7, 225-236 (1944). (Spanish) (Kaplan) 6-190, 7-620.

On the law of density in nebulae as a function of the distance. *Revista Ci.*, Lima 46, 3-11 (1944) = *Actas Acad. Ci.* Lima 7, 3-11 (1944). (Spanish) (Kaplan) 6-75.

On a generalization of Newton's and Kepler's law to explain classically the secular motion of the perihelia of the planets, the determination of the period of the anomalistic revolution and the sidereal revolution. *Revista Ci.*, Lima 46, 219-280 (1944) = *Actas Acad. Ci.* Lima 7, 163-224 (1944). (Spanish) (Kaplan) 6-75, 7-620.

On the integration of the complete equation of diffusion and its application to the study of cells. *Revista Ci.*, Lima 46, 293-325 (1944). (Spanish) (Householder) 6-12.

On the integration of the equation of diffusion in the case of a spherical cell. *Revista Ci.*, Lima 46, 417-450 (1944) = *Actas Acad. Ci.* Lima 7, 317-350 (1944). (Spanish) (Householder) 6-240.

On the present state of the solar system. New dissipative forces acting in addition to universal gravitation. The problem of three bodies within a dissipative system. *Revista Ci.*, Lima 46, 507-584, 2 plates (1944). (Spanish) (Kaplan) 6-190.

On a new cosmogonic theory. *Revista Ci.*, Lima 46, 639-671 (2 plates) (1944). (Spanish) 6-190.

Obituary: George D. Birkhoff. *Revista Ci.*, Lima 46, 675-677 (1944) = *Actas Acad. Ci.* Lima 7, 435-437 (1944). (Spanish) 6-141.

The present state of the solar system. New dissipative and gyroscopic forces which act in addition to universal gravitation. *Actas Acad. Ci.* Lima 8, 3-6 (1945). (Spanish) (Kaplan) 6-190.

On the integration of the equation of diffusion in the case of a spherical cell. *Actas Acad. Ci.* Lima 8, 61-67 (1945). (Spanish) (Householder) 7-133.

On the occurrence in the solar system of dissipative and gyroscopic forces in addition to universal gravitation. *Revista Ci.*, Lima 47, 173-273 (4 plates) (1945). (Spanish) (Kaplan) 7-91.

Cardinal canonical form of the equations of motion of three bodies with the intervention of dissipative and gyroscopic forces in addition to universal gravitation. *Actas Acad. Ci.* Lima 9, 29-41 (1946). (Spanish) 7-493.

Most general cardinal and scalar equations of the dynamics of bodies with internal movement. *Actas Acad. Ci.* Lima 9, 43-110 (1946). (Spanish) (Kaplan) 8-102.

On the most general form of the equations of dynamics for holonomic and nonholonomic systems. *Actas Acad. Ci.* Lima 9, 119-136 (1946). (Spanish) (Kaplan) 8-102.

On the restricted problem of three bodies in the general theory of relativity. *Actas Acad. Ci.* Lima 9, 153-162 (1946). (Spanish) (Kaplan) 8-177.

Reduction of the equations of motion of three bodies of finite masses to the case in which one of the bodies has infinitely small mass. *Actas Acad. Ci.* Lima 9, 163-168 (1946). (Spanish) (Kaplan) 8-177.

General laws of the variation of the density in the nebulae formed in general by viscous fluids and in particular by a perfect fluid in motion. *Actas Acad. Ci.* Lima 9, 221-265 (1946). (Spanish) (Kaplan) 8-609.

General and complete cardinal and scalar equations of relative rotational motion of viscous compressible fluids. *Actas Acad. Ci.* Lima 9, 271-304 (1946). (Spanish) (Kaplan) 8-609.

The fundamental equations of hydrodynamics in generalized Lagrangian form. *Actas Acad. Ci.* Lima 9, 304-329 (1946). (Spanish) (Kaplan) 8-609.

The generalization of the equality of Lagrange and the inequality of Sundman in the case of more than three bodies. *Facultad de Ingeniería Montevideo. Publ. Inst. Mat. Estadística* 1, 129-136 = *Bol. Fac. Ingen. Montevideo* 3 (Año 10), 177-184 (1946). (Spanish) (Kaplan) 8-495.

New forces which occur in our solar system in addition to universal gravitation. *Univ. Nac. Tucumán. Revista A.* 5, 133-146 (1946). (Spanish) (Kaplan) 9-161.

Sobre el Problema Balístico del Projectil-Cohete. [On the Ballistic Problem of the Rocket.] *Imp. de la Escuela Militar, Chorrillos*, 1947. 20 pp. (Bennett) 8-414.

General cardinal equations of motion of viscous fluids. *Actas Acad. Ci.* Lima 10, 25-46 (1947). (Spanish) (Kaplan) 9-218.

Eulerian wind. Case of a compressible fluid. *Actas Acad. Ci.* Lima 10, 47-57 (1947). (Spanish) (Kaplan) 9-218.

Exact equations and exact solutions of the motion and of the tensions in viscous fluids. *Actas Acad. Ci.* Lima 10, 117-170 (1947). (Spanish) (Milne-Thomson) 9-475.

Sur une formule exacte, cardinale et canonique des tensions internes et sur l'équation cardinale, canonique du mouvement des fluides visqueux. *Ann. Soc. Polon. Math.* 21, 107-113 (1948). (Milne-Thomson) 10-214.

The problem of three bodies in the cases of Lagrange and Euler, treated in the general theory of relativity. *Summa Brasil. Math.* 1 (1946), no. 9, 197-205 (1948). (Spanish) (Kaplan) 10-333.

Exact cardinal canonical equations for the finite motions and the tensions in viscous fluids. *Actas Acad. Ci.* Lima 12, 30 pp. (1949). (Spanish) (Milne-Thomson) 11-551.

On the unified field. *Actas Acad. Ci.* Lima 13, 17-27 (1950). (Spanish) (Kaplan) 12-757.

Equations of finite vibratory motions in isotropic elastic media. Surface force sufficient to maintain equilibrium. *Actas Acad. Ci.* Lima 13, 29-38 (1950). (Spanish) (Truesdell) 12-561.

The method of H. Wronski and the classical method of celestial mechanics. *Actas Acad. Ci.* Lima 13, 45-68 (1950). (Spanish) (Lampariello) 13-593.

Deflection of light rays — curvature of light in the new theory of relativity. *Actas Acad. Ci.* Lima 14, 3-6 (1951). (Spanish) 13-696.

The foundations and the construction of a new theory of general relativity. The concept of time. The new complete law of universal gravitation. The differential equations of motion of the new dynamics. *Actas Acad. Ci.* Lima 14, 3-41 (1951). (Spanish) (Lichnerowicz) 12-866.

The ballistic problem in the new theory of relativity. *Actas Acad. Ci.* Lima 14, 9-14 (1951). (Spanish) 13-696.

Equation of the gravitational field in the new alternative theory of general relativity. *Actas Acad. Ci.* Lima 14, 15-19 (1951). (Spanish) 13-696.

The relation between pressure and density. *Actas Acad. Ci.* Lima 14, 20-27 (1951). (Spanish) 13-597.

The new theory of general relativity. *Symposium sobre algunos problemas matemáticos que se están estudiando en Latino América, Diciembre, 1951*, pp. 139-160. Centro de Cooperación Científica de la Unesco para América Latina, Montevideo, Uruguay, 1952. (Spanish) (Lichnerowicz) 14-1023.

On the integration and properties and the integral curves of the complete diffusion equation. *Actas Acad. Ci.* Lima 15, 3-24 (1952). (Spanish) (Feller) 14-381.

New methods in the absolute differential calculus of G. Ricci and T. Levi-Civita and in the theory of general relativity of A. Einstein. *Actas Acad. Ci.* Lima 15, 25-92 (1952). (Spanish) (Ruse) 14-90.

New methods in A. Einstein's general theory of relativity. *Actas Acad. Ci.* Lima 15, 99-135 (1952). (Spanish) (Lichnerowicz) 15-834.

New investigations and results "On the expanding universe and the origin of nebulae." *Actas Acad. Ci.* Lima 16, 3-44 (1953). (Spanish) (H. P. Robertson) 15-657.

On contemporary physics and the Schrödinger equation in the theory of relativity. *Actas Acad. Ci.* Lima 16, nos. 3-4, 3-55 (1953). (Spanish) 15-834.

Absolute form of the transformation of the equations of dynamics in a curved space of n dimensions. *Segundo symposium sobre algunos problemas matemáticos que se están estudiando en Latino América, Julio, 1954*, pp. 87-111. Centro de Cooperación Científica de la UNESCO para América Latina, Montevideo, Uruguay, 1954. (Spanish) (L. A. MacColl) 17-306.

On the integration and properties of a differential equation. *Actas Acad. Ci.* Lima 17, 39-50 (1954). (Spanish) (Massera) 17-36.

On the gyroscopic motion of a projectile. *Actas Acad. Ci.* Lima 17, 61-65 (1954). (Spanish) 16-758.

The equations of the gravitational and cosmological fields. Contracting universe-expanding universe. *Actas Acad. Ci.* Lima 18 (1955), 3-82. (Spanish) (H. P. Robertson) 18-628.

The three "crucial effects" solved by the classical theory. *Actas Acad. Ci.* Lima 19 (1956), 3-26. (Spanish) 18-703.

- On non-linear differential equations. *Actas Acad. Ci. Lima* 19 (1956), 27-50. (Spanish) (S. Lefschetz) 18-739.
- Variability of mass. Total intrinsic energy. The differential equations of motion without recourse to the theory of relativity of A. Einstein. *Actas Acad. Ci. Lima* 20 (1957), no. 3, 1-22. (Spanish) 20 #466.
- Variability of mass, total intrinsic energy, differential equations of motion, without recourse to the theory of relativity of A. Einstein, in the case of velocities greater than the velocity of light. *Actas Acad. Ci. Lima* 20 (1957), no. 4, 1-7. (Spanish) 20 #465.
- Motion of the spiral nebulae. *Actas Acad. Ci. Lima* 20 (1957), no. 4, 8-34. (Spanish) 20 #754.
- The laws and equations of Kepler for orbits with advance of perihelion without recourse to the theory of relativity. *Actas Acad. Ci. Lima* 20 (1957), 3-9. (Spanish) 19-1022.
- Fundamentals of the special theory of relativity. *Actas Acad. Ci. Lima* 20 (1957), 10-58. (Spanish) 19-615.
- On the variation of masses in the motion of planets and comets without recourse to the theory of relativity. *Actas Acad. Ci. Lima* 20 (1957), 59-86. (Spanish) 19-616.

- Sur une méthode d'approximations successives pour l'intégration des systèmes normaux d'équations intégrales différentielles. Ann. Soc. Sci. Bruxelles. Sér. I. 61, 185-190 (1947). (Dressel) 9-357.
- Sur une généralisation d'un théorème de Lindelöf pour les systèmes d'équations différentielles de forme normale. Bull. Soc. Roy. Sci. Liège 16, 2-6 (1947). (Hartman) 9-435.
- Extension d'un théorème de Lagrange aux systèmes complètement intégrables d'équations aux différentielles totales de forme linéaire et homogène. Bull. Soc. Roy. Sci. Liège 16, 17-23 (1947). (Dressel) 9-354.
- Remarque sur une méthode d'approximations successives pour l'intégration des systèmes linéaires d'équations différentielles: extension à des systèmes normaux de forme générale. Bull. Soc. Roy. Sci. Liège 16, 119-125 (1947). (Hartman) 9-435.

Sur l'intégration par approximations successives de systèmes normaux d'équations différentielles dont les seconds membres sont donnés comme limites de suites uniformément convergentes. Bull. Soc. Roy. Sci. Liège 16, 247-254 (1947). (Bellman) 10-712.

Sur des fonction généralisant les noyaux itérés des équations intégrales de Volterra, de seconde espèce. Bull. Soc. Roy. Sci. Liège 16, 268-275 (1947). (Barnett) 11-38.

Sur l'intégration par approximations successives de certains systèmes d'équations aux dérivées partielles du second ordre à deux variables indépendantes. Ann. Soc. Sci. Bruxelles. Sér. I. 62, 3-10 (1948). (J. M. Thomas) 12-103.

Sur une méthode d'approximations successives pour l'intégration de certains systèmes non linéaires d'équations aux dérivées partielles du second ordre à deux variables indépendantes. Ann. Soc. Sci. Bruxelles. Sér. I. 62, 61-66 (1948). (J. M. Thomas) 12-103.

Remarque sur une méthode d'approximations successives pour l'intégration des systèmes linéaires d'équations différentielles; extension à des systèmes normaux de forme générale. II. Ann. Soc. Sci. Bruxelles. Sér. I. 62, 109-113 (1948). (J. M. Thomas) 12-100.

Sur la résolution des systèmes d'équations intégrales. Bull. Soc. Roy. Sci. Liège 17, 2-5 (1948). (Barnett) 11-38.

Sur une méthode d'approximations successives pour l'intégration des systèmes d'équations intégrales de seconde espèce de Volterra. Bull. Soc. Roy. Sci. Liège 17, 26-30 (1948). (Barnett) 11-38.

Sur une proposition de la théorie générale des fonctions analytiques. Bull. Soc. Roy. Sci. Liège 17, 62-65 (1948). (Boas) 11-21.

Sur une application d'un théorème de E. Picard relatif aux produits indéfinis de facteurs primaires. Bull. Soc. Roy. Sci. Liège 17, 138-143 (1948). (Boas) 11-21.

Extension d'un théorème d'E. Picard sur les produits indéfinis de facteurs, primaires. Bull. Soc. Roy. Sci. Liège 17, 180-185 (1948). (Boas) 11-21.

Sur les systèmes complètement intégrables d'équation aux différentielles totales. Bull. Soc. Roy. Sci. Liège 17, 200-208 (1948). (Dressel) 10-711.

Un exemple de produit indéfini de facteurs primaires dont les zéros sont les racines d'équations non résolues. Bull. Soc. Sci. Liège 17, 224-229 (1948). (Boas) 11-21.

Un exemple de produit indéfini de facteurs primaires dont les zéros sont les racines d'équations non résolues. II. Bull. Soc. Roy. Sci. Liège 17, 294-296 (1948). (Boas) 11-21.

Remarque sur une application du théorème de Rouché. Bull. Soc. Roy. Sci. Liège 17, 303-307 (1948). (Boas) 11-21.

Sur une modalité de la méthode d'intégration par approximations successives des équations aux dérivées partielles du premier ordre. Ann. Soc. Sci. Bruxelles. Sér. I. 63, 31-35 (1949). (J. M. Thomas) 12-103.

Sur certains systèmes linéaires d'équations aux dérivées partielles du second ordre. Ann. Soc. Sci. Bruxelles. Sér. I. 63, 67-73 (1949). (John) 12-30.

Sur certains systèmes linéaires d'équations aux dérivées partielles du troisième ordre. Ann. Soc. Sci. Bruxelles. Sér. I. 63, 148-154 (1949). (John) 12-30.

Remarque sur l'emploi d'équations linéaires à coefficients variables dans la méthode d'intégration par approximations successives des équations différentielles normales. Bull. Soc. Roy. Sci. Liège 18, 3-8 (1949). (Bellman) 10-712.

Sur la propriété d'inversion des intégrales de Cauchy d'un système d'équations différentielles de forme normale. Bull. Soc. Roy. Sci. Liège 18, 32-37 (1949). (Bellman) 10-712.

Sur l'intégrale de Darboux d'une équation aux dérivées partielles du premier ordre. Bull. Soc. Roy. Sci. Liège 18, 102-107 (1949). (Dressel) 10-712.

Remarque sur un théorème d'existence des solutions de certains systèmes d'équations aux dérivées partielles du premier ordre. Bull. Soc. Roy. Sci. Liège 18, 127-133 (1949). (Janet) 11-251.

Sur des équations intégro-différentielles récurrentes. Bull. Soc. Roy. Sci. Liège 18, 250-258 (1949). (Reid) 11-368.

Sur l'intégrale non singulière de l'équation différentielle du premier ordre de forme non résolue, tangente à l'intégrale singulière de première espèce de cette équation. Bull. Soc. Roy. Sci. Liège 18, 334-342 (1949). (Dressel) 11-664.

Sur la fonction de Riemann associée à l'équation aux dérivées partielles du second ordre, de forme linéaire, du type hyperbolique. Bull. Soc. Roy. Sci. Liège 18, 383-390 (1949). (John) 11-724.

Sur des équations récurrentes aux dérivées partielles du second ordre. Bull. Soc. Roy. Sci. Liège 18, 474-480 (1949). (Bellman) 11-724.

Sur les systèmes complètement intégrables d'équations récurrentes aux différentielles totales. III^e Congrès National des Sciences, Bruxelles, 1950, Vol. 2, pp 14-17. Fédération belge des Sociétés Scientifiques, Bruxelles. 16-1027.

Sur certains systèmes linéaires d'équations aux dérivées partielles du troisième ordre. II. Ann. Soc. Sci. Bruxelles. Sér. I. 64, 26-30 (1950). (John) 12-416.

Sur les équations récurrentes, aux différentielles totales, complètement intégrables. Ann. Soc. Sci. Bruxelles. Sér. I. 64, 62-73 (1950). (J. M. Thomas) 12-100.

Les solutions infiniment voisines des équations récurro-différentielles. Ann. Soc. Sci. Bruxelles. Sér. I. 64, 148-153 (1950). (J. M. Thomas) 12-500.

Sur des fonctions généralisant les noyaux itérés des équations intégrales de Volterra, de seconde espèce, à deux variables indépendantes. Bull. Soc. Roy. Sci. Liège 19, 2-8 (1950). (Barnett) 12-30.

Sur les équations récurrentes définissant des fonctions implicites. Bull. Soc. Roy. Sci. Liège 19, 74-82 (1950). (Bellman) 12-106.

Sur des équations intégrales récurrentes. I. Bull. Soc. Roy. Sci. Liège 19, 142-149 (1950). (Barnett) 12-339.

Sur des équations intégrales récurrentes. II. Bull. Soc. Roy. Sci. Liège 19, 198-203 (1950). (Barnett) 12-339.

Sur les formules d'addition des intégrales d'un système complètement intégrable, linéaire, homogène, à coefficients constants, d'équations aux différentielles totales. I. Bull. Soc. Roy. Sci. Liège 19, 216-221 (1950). (J. M. Thomas) 12-500.

Sur les formules d'addition des intégrales d'un système complètement intégrable, linéaire, homogène, à coefficients constants, d'équations aux différentielles totales. II. Bull. Soc. Roy. Sci. Liège 19, 278-285 (1950). (J. M. Thomas) 12-500.

Application de la méthode des fonctions majorantes à la théorie des équations récurro-différentielles. Bull. Soc. Roy. Sci. Liège 19, 359-368 (1950). (J. M. Thomas) 13-40.

Sur certains systèmes récurrents d'équations aux dérivées partielles du premier ordre. Bull. Soc. Roy. Sci. Liège 19, 438-447 (1950). (J. M. Thomas) 13-40.

Sur certains systèmes d'équations récurrentes aux dérivées partielles du premier ordre. II. Bull. Soc. Roy. Sci. Liège 19, 503-506 (1950). (J. M. Thomas) 13-40.

Sur les équations récurrentes aux dérivées partielles du premier ordre, de forme résolue par rapport à une dérivée. Bull. Soc. Roy. Sci. Liège 19, 507-513 (1950). (Zervos) 13-241.

Sur les équations récurrentes aux dérivées partielles du premier ordre, de forme linéaire et homogène. Ann. Soc. Sci. Bruxelles. Sér. I. 65, 25-32 (1951). (J. M. Thomas) 13-40.

Application de la méthode des fonctions majorantes à des systèmes d'équations récurrentes définissant des fonctions implicites. Ann. Soc. Sci. Bruxelles. Sér. I. 65, 64-70 (1951). (Bellman) 13-43.

Sur une extension d'un théorème de Jacobi pour l'intégration des équations aux dérivées partielles du premier ordre de

forme résolue par rapport à la dérivée en x_1 . Ann. Soc. Sci. Bruxelles. Sér. I. 65, 103-108 (1951). (J. M. Thomas) 13-559.

Application de la méthode des fonctions majorantes à la théorie des systèmes d'équations récurro-différentielles. Bull. Soc. Roy. Sci. Liège 20, 2-13 (1951). (J. M. Thomas) 13-40.

Sur les systèmes récurrents d'équations aux dérivées partielles du premier ordre, de forme résolue par rapport aux dérivées partielles en x_1 . Bull. Soc. Roy. Sci. Liège 20, 69-76 (1951). (J. M. Thomas) 13-656.

Extension du théorème de Mme. de Kowaleski aux systèmes récurrents d'équations normales aux dérivées partielles d'ordre quelconque. Bull. Soc. Roy. Sci. Liège 20, 135-142 (1951). (J. M. Thomas) 13-656.

Sur les intégrales infiniment voisines des systèmes d'équations récurro-différentielles. Bull. Soc. Roy. Sci. Liège 20, 238-248 (1951). (J. M. Thomas) 13-345.

Sur les dérivées, par rapport aux paramètres, des intégrales infiniment voisines des systèmes d'équations différentielles récurrentes. Généralisation des équations aux variations de Poincaré. Bull. Soc. Roy. Sci. Liège 20, 333-346 (1951). (J. M. Thomas) 13-345.

Remarque sur les intégrales infiniment voisines des équations différentielles de forme normale dépendant d'un paramètre variable. Bull. Soc. Roy. Sci. Liège 20, 392-399 (1951). (Stewart) 13-744.

Remarque sur l'extension d'un théorème de Poincaré aux solutions infiniment voisines des systèmes complètement intégrables d'équations aux différentielles totales renfermant un paramètre variable. Bull. Soc. Roy. Sci. Liège 20, 455-463 (1951). (J. M. Thomas) 13-845.

Sur la généralisation d'un théorème de Jacobi pour l'intégration des systèmes d'équations aux dérivées partielles du premier ordre de forme résolue par rapport aux dérivées en x_1 . Bull. Soc. Roy. Sci. Liège 20, 609-616 (1951). (J. M. Thomas) 13-846.

Extension d'un théorème de Poincaré aux équations récurro-différentielles de forme normale dépendant d'un paramètre variable. Bull. Soc. Roy. Sci. Liège 20, 678-684 (1951). (MacColl) 14-46.

Cours d'analyse supérieure de la Licence en Sciences mathématiques. Vol. II. Equations différentielles (en 3 fascicules). Université de Liège, Liège, (1952) 1027 + xlii + xi pp. (F. A. Ficken) 17-18.

Cours d'analyse supérieure de la Licence en Sciences mathématiques. Vol. I. Théorie des fonctions (en 2 fascicules). Université de Liège, Liège, undated. pp. 1-126, 287-732. (F. A. Ficken) 17-18.

Extension d'un théorème de Poincaré aux systèmes d'équations récurro-différentielles de forme normale dépendant d'un paramètre variable. Ann. Soc. Sci. Bruxelles. Sér. I. 66, 27-30 (1952). (MacColl) 14-47.

Un exemple simple de produit indéfini de facteurs primaires dont les zéros sont les racines d'équations récurrentes. Ann. Soc. Sci. Bruxelles. Sér. I. 66, 49-54 (1952). 13-900.

Application de la méthode des fonctions majorantes à l'étude de certaines équations intégréo-différentielles récurrentes. Ann. Soc. Sci. Bruxelles. Sér. I. 66, 125-130 (1952). (Barnett) 14-765.

Sur les fonctions généralisant les noyaux itérés des systèmes d'équations intégrales de Volterra, de seconde espèce. Bull. Soc. Roy. Sci. Liège 21, 2-6 (1952). (Barnett) 14-53.

Sur les fonctions généralisant les noyaux itérés des systèmes d'équations intégrales de Volterra, de seconde espèce. II. Bull. Soc. Roy. Sci. Liège 21, 42-45 (1952). (Barnett) 14-562.

Sur l'intégration, par approximations successives, de certains systèmes d'équations intégrales à plusieurs variables indépendantes. Bull. Soc. Roy. Sci. Liège 21, 73-78 (1952). (Barnett) 14-382.

Sur l'intégration des équations récurro-différentielles par la méthode des approximations successives. Bull. Soc. Roy. Sci. Liège 21, 260-265 (1952). (MacColl) 14-375.

Sur l'intégration des systèmes d'équations récurro-différentielles par la méthode des approximations successives. Bull. Soc. Roy. Sci. Liège 21, 309-313 (1952). (MacColl) 14-645.

Sur une modalité de l'intégration par approximations successives des systèmes d'équations récurro-différentielles. Bull. Soc. Roy. Sci. Liège 21, 403-407 (1952). (MacColl) 14-750.

Extension à des équations intégréo-différentielles récurrentes à plusieurs variables indépendantes, du théorème de Cauchy relatif à l'existence des intégrales des équations aux dérivées partielles du premier ordre. Bull. Soc. Roy. Sci. Liège 21, 491-496 (1952). (Barnett) 14-987.

Application de la méthode des fonctions majorantes à l'étude de certains systèmes d'équations intégréo-différentielles récurrentes. II. Ann. Soc. Sci. Bruxelles. Sér. I. 67, 13-18 (1953). (Barnett) 14-765.

Sur les intégrales régulières au sens de Fuchs de certains systèmes d'équations différentielles. Ann. Soc. Sci. Bruxelles. Sér. I. 67, 69-76 (1953). (MacColl) 14-1087.

Sur des équations intégréo-différentielles récurrentes de forme normale, dont les termes intégraux contiennent les dérivées des fonctions inconnues. Ann. Soc. Sci. Bruxelles. Sér. I. 67, 177-185 (1953). (Barnett) 15-630.

Extension à des systèmes d'équations intégréo-différentielles récurrentes à plusieurs variables indépendantes du théorème de Cauchy relatif à l'existence des intégrales des systèmes d'équations aux dérivées partielles du premier ordre. Bull. Soc. Roy. Sci. Liège 22, 2-10 (1953). (Barnett) 14-987.

Sur les solutions infiniment voisines des équations intégréo-différentielles récurrentes de forme normale. Bull. Soc. Roy. Sci. Liège 22, 64-76 (1953). (Barnett) 14-988.

Sur l'intégration, par la méthode des approximations successives, des systèmes normaux d'équations intégréo-différentielles récurrentes. Bull. Soc. Roy. Sci. Liège 22, 131-138 (1953). (Barnett) 15-232.

Sur les intégrales infiniment voisines des systèmes d'équations intégréo-différentielles récurrentes de forme normale. Bull. Soc. Roy. Sci. Liège 22, 198-210 (1953). (Barnett) 15-232.

Sur l'intégrale de Darboux d'une équation aux dérivées partielles du premier ordre de forme résolue et sur sa généralisation. Bull. Soc. Roy. Sci. Liège 22, 264-275 (1953). (J. M. Thomas) 15-317.

Sur l'application de la méthode des approximations successives à la détermination de l'intégrale de Darboux et de sa généralisation dans le cas d'une équation aux dérivées partielles du premier ordre de forme résolue. I, II. Bull. Soc. Roy. Sci. Liège 22, 359-367, 423-436 (1953). (J. M. Thomas) 15-625.

Sur des systèmes d'équations récurrentes aux dérivées partielles du second ordre. Bull. Soc. Roy. Sci. Liège 22, 504-513 (1953). (J. M. Thomas) 15-626.

Sur des systèmes d'équations intégréo-différentielles récurrentes de forme normale dont les termes intégraux contiennent les dérivées des fonctions inconnues. Ann. Soc. Sci. Bruxelles. Sér. I. 68, 5-12 (1954). (Barnett) 16-46.

Sur une équation intégrale généralisant l'équation de première espèce de Volterra. Extension d'un théorème de Le Roux. Ann. Soc. Sci. Bruxelles. Sér. I. 68, 34-41 (1954). (Barnett) 16-46.

Une remarque sur la théorie des fonctions intégrables. Bull. Soc. Roy. Sci. Liège 23, 6-12 (1954). (Hildebrandt) 15-784.

Sur l'application de la méthode des approximations successives à la détermination des fonctions inverses. Bull. Soc. Roy. Sci. Liège 23, 106-114 (1954). (Bartie) 15-944.

Liste des publications de R. H. Gernay. Bull. Soc. Roy. Sci. Liège 23, 340-359 (1954). 16-434.

Germeier, G.

Sur les nombres dérivés symétriques. Rec. Math. [Mat. Sbornik] N. S. 12 (54), 121-145 (1943). (Russian. French summary) (Kac) 5-114.

Germeier, Yu. B.

---- and Irger, D. S.

On approximate representations of solutions of linear differential equations of second order. Doklady Akad. Nauk SSSR (N. S.) 93, 961-964 (1953). (Russian) (Levinson) 15-873.

Germer, Henning

Einige kubische und quadratische Transformationen im projektiven R_3 . Math. Nachr. 15 (1956), 299-338. (P. Abellanas) 19-321.

Germogenova, T. A.

On solving the translation equation for strongly anisotropic scattering. Dokl. Akad. Nauk SSSR (N. S.) 113 (1957), 297-300. (Russian) 19-1012.

Gernet, M. M.

Experimental determination of products of inertia, and dynamic balancing without a balancing machine. Akad. Nauk SSSR. Trudy Sem. Teorii Mašin i Mechanizmov 9, no. 33, 39-52 (1950). (Russian) (Wundheiler) 13-593.

Gerneth, Dal Charles

Generalization of Menger's result on the structure of logical formulas. Bull. Amer. Math. Soc. 54, 803-804 (1948). (Lorenzen) 10-93.

Gerolini, Annamaria

Compactification des espaces séparés. C. R. Acad. Sci. Paris 232, 1056-1058 (1951). (Arens) 12-626.

Geronimus, Ya. L. (Heronimus J. L.)

Sur un problème-minimum. C. R. (Doklady) Acad. Sci. URSS (N. S.) 24, 224-226 (1939). (Shohat) 2-92.

Sur les polynômes orthogonaux relatifs à une suite de nombres donnée et sur le théorème de W. Hahn. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 4, 215-228 (1940). (Russian. French summary) (Shohat) 2-97, 419.

Generalized orthogonal polynomials and the Christoffel-Darboux formula. C. R. (Doklady) Acad. Sci. URSS (N. S.) 26, 847-849 (1940). (Shohat) 2-194.

Sur quelques propriétés des polynômes orthogonaux généralisés. C. R. (Doklady) Acad. Sci. URSS (N. S.) 29, 5-8 (1940). (Shohat) 2-195.

Sur quelques équations aux différences finies et les systèmes correspondants des polynômes orthogonaux. C. R. (Doklady) Acad. Sci. URSS (N. S.) 29, 536-538 (1940). (Shohat) 2-282.

The generalization of a lemma of M. S. Kakeya. Bull. Amer. Math. Soc. 47, 93-95 (1941). (Shohat) 2-242.

On the orthogonality of a system of polynomials on several contours. Comm. Inst. Sci. Math. Méc. Univ. Kharkoff [Zapiski Inst. Mat. Mech.] (4) 16, 12-32 (1940). (Russian. English summary) (Shohat) 2-363.

On polynomials orthogonal with regard to a given sequence of numbers. Comm. Inst. Sci. Math. Méc. Univ. Kharkoff [Zapiski Inst. Mat. Mech.] (4) 17, 3-18 (1940). (Russian. English summary) (Shohat) 2-362.

On the character of the solution of the moment-problem in the case of the periodic in the limit associated fraction. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 5, 203-210 (1941). (Russian. English summary) (Tamarkin) 3-110.

Sur quelques propriétés des polynômes orthogonaux généralisés. Rec. Math. [Mat. Sbornik] N. S. 9 (51), 121-135 (1941). (Russian. French summary) (Shohat) 2-362.

On polynomials orthogonal on the circle, on trigonometric moment-problem and on allied Carathéodory and Schur functions. C. R. (Doklady) Acad. Sci. URSS (N. S.) 39, 291-295 (1943). (Szegő) 6-62.

On Gauss' and Tchebycheff's quadrature formulas. Bull. Amer. Math. Soc. 50, 217-221 (1944). (Erdős) 6-63.

On some distribution functions connected with systems of polynomials. C. R. (Doklady) Acad. Sci. URSS (N. S.) 44, 355-359 (1944). (Offord) 7-63.

On polynomials orthogonal on the circle, on trigonometric moment-problem and on allied Carathéodory and Schur functions. Rec. Math. [Mat. Sbornik] N. S. 15 (57), 99-130 (1944). (Russian. English summary) (Offord) 7-63.

On the trigonometric moment problem. Ann. of Math. (2) 47, 742-761 (1946). (Szegő) 8-265.

On positive trigonometric polynomials and harmonic functions. C. R. (Doklady) Acad. Sci. URSS (N. S.) 51, 569-572 (1946). (Pollard) 8-262.

On Gauss' and Tchebycheff's quadrature formulae. C. R. (Doklady) Acad. Sci. URSS (N. S.) 51, 655-658 (1946). (Schoenberg) 10-37.

On the calculation of the counterweights of a crankshaft to reduce the bearing loads. Akad. Nauk SSSR. Trudy Sem. Teorii Mašin i Mechanizmov 2, 164-174 (1947). (Russian) (Wundheiler) 13-170.

Sur quelques transformations des fractions continues et les systèmes correspondants des polynômes orthogonaux. Akad. Nauk Ukrain. RSR. Zbirnik Prac Inst. Mat. 1946, no. 8, 121-133 (1947). (Ukrainian. Russian and French summaries) (W. T. Scott) 12-331.

On best approximation by means of functions not forming a Čebyšev system. Doklady Akad. Nauk SSSR (N. S.) 57, 7-10 (1947). (Russian) (Boas) 9-236.

The orthogonality of some systems of polynomials. Duke Math. J. 14, 503-510 (1947). (Pollard) 9-30.

O primeneni metodov Čebyševa k zadatke uravnoveshivaniya mehanizmov. [On the Application of Čebyšev's Methods to the Problem of the Balancing of Mechanisms]. Gosudarstv. Izdat. Tehn.-Teor. Lit., Moscow-Leningrad, 1948. 148 pp. (Wundheiler) 13-392.

An application of the method of best approximation to balancing. Akad. Nauk SSSR. Trudy Sem. Teorii Mašin i Mechanizmov 4, no. 14, 64-67 (1948). (Russian) (Wundheiler) 13-170.

Motions with a minimum peak acceleration. Akad. Nauk SSSR. Trudy Sem. Teorii Mašin i Mechanizmov 4, no. 15, 66-91 (1948). (Russian) (Wundheiler) 13-171.

Concerning the design of some cam mechanisms with piecewise circular cams. Akad. Nauk SSSR. Trudy Sem. Teorii Mašin i Mechanizmov 5, no. 17, 69-79 (1948). (Russian) (Wundheiler) 13-171.

On some problems in the synthesis of cam mechanisms. Akad. Nauk SSSR. Trudy Sem. Teorii Mašin i Mechanizmov 5, no. 19, 62-81 (1948). (Russian) (Wundheiler) 13-171.

On certain inequalities in the theory of functions of Carathéodory and Schur type. Doklady Akad. Nauk SSSR (N. S.) 60, 953-956 (1948). (Russian) (Macintyre) 10-110.

On asymptotic properties of polynomials deviating least from zero in the space L^p_σ . Doklady Akad. Nauk SSSR (N. S.) 62, 9-12 (1948). (Russian) (Zygmund) 10-295.

Refinement of estimates of van der Corput, Visser, Fejes and Boas for the coefficients of trigonometric polynomials. Doklady Akad. Nauk SSSR (N. S.) 63, 479-482 (1948). (Russian) (Boas) 10-368.

On asymptotic formulas for orthogonal polynomials. Izvestiya Akad. Nauk SSSR. Ser. Mat. 12, 3-14 (1948). (Russian) (Kogbetliantz) 9-429.

On certain extremal properties of analytic functions. Izvestiya Akad. Nauk SSSR. Ser. Mat. 12, 325-336 (1948). (Russian) (Fuchs) 10-26.

On certain asymptotic properties of polynomials. Mat. Sbornik N. S. 23 (65), 77-88 (1948). (Russian) (Piranian) 10-190.

Polynomials orthogonal on a circle and their applications. Zapiski Naučno-Issled. Inst. Mat. Meh. Har'kov. Mat. Obšč. (4) 19, 35-120 (1948). (Russian) (Boas) 12-176.

On the closure of certain systems of functions in the space L^p_σ . Doklady Akad. Nauk SSSR (N. S.) 64, 611-614 (1949). (Russian) (Fuchs) 10-530.

On some quadrature formulas. Doklady Akad. Nauk SSSR (N. S.) 65, 437-440 (1949). (Russian) (Bruins) 10-703.

- On the degree of precision of quadrature formulas. Doklady Akad. Nauk SSSR (N.S.) 68, 437-440 (1949). (Russian) (Offord) 11-236.
- On certain polynomials of Steffensen. Doklady Akad. Nauk SSSR (N.S.) 69, 721-724 (1949). (Russian) (Sheffer) 11-432.
- On the closure of certain systems of functions in L_p space. Har'kov. Gos. Univ. Uč. Zap. 29=Zap. Mat. Otd. Fiz.-Mat. Fak. i Har'kov. Mat. Obšč. (4) 21 (1949), 23-45. (Russian) (W. H. J. Fuchs) 17-1203.

Analisi in Italia nel campo complesso (dal 1939 al 1945). Pont. Acad. Sci. Relations Auctis Sci. Temp. Belli 5, 35 pp. (1945). 9-575.

Sull'approssimazione delle funzioni continue. Atti Accad. Sci. Torino. Cl. Sci. Fis. Mat. Nat. 80, 225-230 (1945). (Boas) 8-458.

Sopra due particolari problemi misti di Dirichlet-Neumann per l'equazione di Laplace. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 1, 40-44 (1946). (Green) 8-270.

Sul problema dell'equilibrio di una piastra indefinita a forma di striscia, incastrata lungo i due lati. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 1, 214-218 (1946). 8-359.

Sul metodo della trasformata parziale di Laplace a intervallo di integrazione finito. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 1, 691-696 (1946). (Zernike) 9-94.

Su un nuovo procedimento di interpolazione. Ricerca Sci. 16, 78-80 (1946). (Milne) 8-55.

Sopra un particolare problema misto di Dirichlet-Neumann per l'equazione di Laplace, trattato col metodo delle trasformate parziali. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 5, 131-168 (1946). (Green) 9-142.

Condizioni necessarie e sufficienti per i momenti di una funzione limitata. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 2, 533-536 (1947). (Feller) 9-137.

Un'osservazione sul metodo di Ritz ed applicazione al calcolo della frequenza fondamentale di una membrana circolare con foro circolare eccentrico. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 2, 559-564 (1947). (Bremekamp) 9-186.

Tavola della funzione euleriana $\Gamma(z)$ per valori complessi dell'argomento. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 3, 254-257 (1947). (van Veen) 9-619.

Sul comportamento asintotico degli integrali delle equazioni differenziali ordinarie, lineari ed omogenee. Giorn. Mat. Battaglini (4) 1(77), 5-27 (1947). (Levinson) 9-436.

Sul calcolo di un integrale che compare nella teoria della produzione di coppie di elettroni. Univ. Nac. Tucumán, Revista A. 6, 37-50 (1947). (Erdélyi) 9-619.

Sul metodo della trasformata parziale di Laplace a intervallo di integrazione finito. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 6, 1-47 (1947). (John) 9-94.

Ricerche analitiche sul problema dell'equilibrio di una piastra indefinita a forma di striscia, incastrata lungo i due lati. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 6, 145-187 (1947). (Opatowski) 9-121.

Sul prodotto di due variabili casuali gaussiane. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 534-539 (1948). (Doob) 10-200, 856.

Su un particolare problema misto per un'equazione di tipo ellittico a coefficienti costanti. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 5, 344-348 (1948). (Marble) 11-37.

Applicazione del metodo della trasformata parziale di Laplace al problema di Dirichlet per l'equazione $\Delta_2 u - \Delta_1^2 u = F$ in n variabili. Rend. Sem. Mat. Univ. Padova 17, 39-74 (1948). (Copson) 10-539.

Sugli stati di tensione piana in un corpo elastico. Ann. Mat. Pura Appl. (4) 29, 125-130 (1949). (Truesdell) 12-63.

Sul problema dei momenti. Univ. e Politecnico Torino. Rend. Sem. Mat. 8, 93-107 (1949). (Boas) 11-237.

Un teorema sul comportamento asintotico degli integrali delle equazioni differenziali lineari omogenee. Univ. Roma.

Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 8, 28-42 (1949). (Bellman) 11-721.

Sui coefficienti di Fourier di una funzione limitata, compresa fra limiti assegnati. Ann. Scuola Norm. Super. Pisa (3) 4, 131-156. Consiglio Naz. Ricerche. Pubbl. Ist. Appl. Calcolo no. 279 (1950). (Boas) 12-94.

Flow in a not homogeneous and anisotropic medium. Ann. Soc. Polon. Math. 22 (1949), 195-200 (1950). (Truesdell) 11-667.

Sul teorema di prodotto integrale nella teoria della trasformazione di Laplace. Univ. e Politecnico Torino. Rend. Sem. Mat. 9, 251-261 [= Consiglio Naz. Ricerche. Pubbl. Ist. Appl. Calcolo no. 290] (1950). (Boas) 12-498.

Sugli sviluppi in serie di funzioni di Hermite. Ann. Scuola Norm. Super. Pisa (3) 5, 29-37 (1951). (Szegő) 13-646.

Sui problemi di Dirichlet e di Neumann per l'ellisse. Rend. Sem. Mat. Univ. Padova 20, 244-248 (1951). (Green) 12-826.

Sopra un fondamentale teorema nella teoria della trasformazione di Laplace. Rend. Sem. Fac. Sci. Univ. Cagliari 21 (1951), 103-115 (1952). (Schoenberg) 15-524.

Ricerche abeliane e tauberiane compiute nell'istituto Nazionale per le Applicazioni del Calcolo. Ann. Mat. Pura Appl. (4) 34, 113-132 (1953). 14-977.

Sulle equazioni alle derivate parziali del 2° ordine, lineari, in due variabili indipendenti, le cui soluzioni godono di proprietà integrali rispetto ad una delle variabili. Ann. Mat. Pura Appl. (4) 40 (1955), 41-59. (D. L. Bernstein) 19-426.

Sui coefficienti di Fourier-Stieltjes di una funzione non decrescente. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 20 (1956), 580-583. (R. P. Boas, Jr.) 18-735.

Sui coefficienti di Legendre-Stieltjes di Una funzione non decrescente. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 20 (1956), 753-758. (R. P. Boas, Jr.) 19-545.

Sulle formule di quadratura. Rend. Sem. Mat. Fis. Milano 26 (1954-1955), 45-60. Consiglio Naz. Ricerche. Pubbl. Ist. Appl. Calcolo no. 434 (1956), 16 pp. (W. Gautschi) 18-391.

Sulla convergenza dei procedimenti di calcolo, degli integrali definiti, forniti dalle formule di quadratura. Rend. Sem. Mat. Univ. Padova 26 (1956), 201-222. 18-722.

Sugli integrali doppi di espressioni lineari alle derivate parziali. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 22 (1957), 276-281. (T. Viola) 19-1061.

Sugli integrali doppi di espressioni lineari alle derivate parziali. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 22 (1957), 430-433. (T. Viola) 19-1061.

Obituary: Ugo Amaldi. Rend. Mat. e Appl. (5) 16 (1957), 511-514. 19-1248.

Sulle formule di quadratura. Rend. Sem. Mat. Fis. Milano 26 (1954-55), 45-60 (1957). (D. H. Lehmer) 19-462.

Su una particolare equazione differenziale ordinaria non lineare. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 24 (1958), 262-269. (D. C. Lewis, Jr.) 20#4055.

Sur les involutions irrégulières appartenant à une surface irrégulière. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 32 (1946), 198-204 (1947). 9-57.

Construction de surfaces algébriques irrégulières. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 32 (1946), 427-440 (1947). 9-56.

Sur quelques surfaces algébriques irrégulières. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 32 (1946), 457-464 (1947). 9-56.

Recherches sur la construction de surfaces algébriques irrégulières. I. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 22-32 (1947). (Pedoe) 9-57.

Recherches sur la construction de surfaces algébriques irrégulières. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 33-38 (1947). (Pedoe) 9-57.

Recherches sur la construction de surfaces algébriques irrégulières. III. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 67-76 (1947). (Pedoe) 9-57.

Remarques sur les systèmes linéaires de courbes tracées sur une surface algébrique et sur un théorème de Picard. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 403-410 (1947). 9-199.

Sur les correspondances rationnelles entre deux surfaces algébriques régulières. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 485-491 (1947). (Piazzolla-Beloch) 9-462.

Construction d'une surface du cinquième ordre, de genre zéro et de bigenre un. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 492-501 (1947). (Piazzolla-Beloch) 9-463.

Sur la courbe canonique de genre six. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 611-616 (1947). 9-375.

La géométrie algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 33, 901-918 (1947). 9-485.

Sur une suite de quadriques associée à une congruence W. Amer. J. Math. 69, 490-492 (1947). (Decuyper) 9-62.

Sur une surface canonique d'irrégularité 1. Bull. Sci. Math. (2) 71, 7-16 (1947). (Piazzolla-Beloch) 9-462.

Surfaces dont le système canonique appartient à une involution. Bull. Soc. Roy. Sci. Liège 16, 7-9 (1947). 9-375.

Sur quelques surfaces-enveloppes du huitième ordre. Bull. Soc. Roy. Sci. Liège 16, 9-17 (1947). 9-375.

Sur les droites multiples des surfaces algébriques. Bull. Soc. Roy. Sci. Liège 16, 74-77 (1947). (Gauthier) 9-462.

Sur les surfaces circonscrites à une surface cubique. Bull. Soc. Roy. Sci. Liège 16, 110-119 (1947). (J. A. Todd) 9-462.

Sur l'existence de certaines surfaces doubles. Bull. Soc. Roy. Sci. Liège 16, 128-133 (1947). 10-735.

Observations sur la structure des points de diramation des surfaces multiples cycliques. Bull. Soc. Roy. Sci. Liège 16, 242-247 (1947). 10-735.

Sur une surface représentant une involution cyclique du quatrième ordre. Math. Notae 7, 205-211 (1947). (Piazzolla-Beloch) 10-264.

Sur quelques courbes planes contenant des involutions cycliques. Nieuw Tijdschr. Wetkunde 35, 163-165 (1947). 9-305.

Les surfaces algébriques irrégulières. Revue Sci. 85, 812-816 (1947). 9-375.

Sur un faisceau de surfaces du sixième ordre. Simon Stevin 25, 49-55 (1947). (Turnbull) 8-600.

Sur les surfaces semi-canoniques de l'espace ordinaire. Univ. Nac. Tucumán. Revista A. 6, 81-89 (1947). (Piazzolla-Beloch) 10-208.

Sur certains points unis des involutions cycliques appartenant à une surface algébrique. Publ. Fac. Sci. Univ. Masaryk no. 310, 13 pp. (1948). (Gauthier) 11-205.

Sur une surface de rang p n'ayant que des points de diramation doubles biplanaires. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 115-121 (1948). (Hollcroft) 10-264.

Sur la construction de surfaces doubles. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 198-205 (1948). (Piazzolla-Beloch) 10-474.

Recherches sur les points unis isolés des involutions cycliques appartenant à une surface algébrique. I. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 206-228 (1948). (Piazzolla-Beloch) 10-474.

Recherches sur les points unis isolés des involutions cycliques appartenant à une surface algébrique. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 290-302 (1948). (Piazzolla-Beloch) 10-474.

Sur une involution cyclique du onzième ordre appartenant à une surface algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 303-313 (1948). (Piazzolla-Beloch) 10-474.

Sur les points unis des involutions cycliques appartenant à une variété algébrique à trois dimensions. I. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 419-425 (1948). (Piazzolla-Beloch) 10-474.

Sur les points unis des involutions cycliques appartenant à une variété algébrique à trois dimensions. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 518-530 (1948). (Piazzolla-Beloch) 10-475.

Recherches sur les points unis isolés des involutions cycliques appartenant à une surface algébrique. III. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 646-650 (1948). (Piazzolla-Beloch) 11-205.

Sur les points unis des involutions cycliques appartenant à une variété algébrique à trois dimensions. III. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 695-700 (1948). (Piazzolla-Beloch) 11-392.

Points unis symétriques des involutions cycliques appartenant à une surface algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 843-845 (1948). 10-475.

Sur les systèmes linéaires de courbes planes ayant pour adjoint un faisceau de cubiques. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 34, 846-850 (1948). 10-475.

Les points unis des involutions cycliques appartenant à une surface algébrique. Ann. Sci. École Norm. Sup. (3) 65, 189-210 (1948). (Piazzolla-Beloch) 11-392.

Remarques sur les surfaces algébriques possédant une involution cyclique privée de points unis. Ann. Sci. Polon. Math. 20 (1947), 241-250 (1948). (Piazzolla-Beloch) 10-474.

Points unis isolés des involutions cycliques appartenant à une surface algébrique. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 5, 243-246 (1948). 10-475.

Étude d'une involution cyclique appartenant à une surface algébrique. Bull. École Polytech. Jassy [Bul. Politehn. Gh. Asachi. Iași] 3, 107-112 (1948). 10-62.

Sur la construction de modèles de surfaces algébriques contenant des involutions cycliques. Bull. Soc. Roy. Sci. Liège 17, 56-61 (1948). 10-735.

Sur la structure des points unis isolés des involutions cycliques appartenant à une surface algébrique. Bull. Soc. Roy. Sci. Liège 17, 116-127 (1948). 10-735.

Sur la structure des points unis des involutions cycliques appartenant à une surface algébrique. Étude d'un exemple. Bull. Soc. Roy. Sci. Liège 17, 127-137 (1948). 10-735.

Sur les surfaces irrégulières contenant un système linéaire isolé. Bull. Soc. Roy. Sci. Liège 17, 196-199 (1948). 10-735.

Construction de surfaces algébriques de diviseur quelconque. Bull. Soc. Roy. Sci. Liège 17, 220-224 (1948). (Conforto) 11-457.

Remarques sur les points unis isolés des involutions cycliques appartenant à une surface algébrique. Bull. Soc. Roy. Sci. Liège 17, 297-303 (1948). 10-736.

Structure des points unis des involutions cycliques appartenant à une surface algébrique. C. R. Acad. Sci. Paris 227, 173-175 (1948). (Piazzolla-Beloch) 10-264.

Sur certaines courbes fondamentales des transformations birationnelles de l'espace. Revista Ci., Lima 50, 31-37 (1948). 10-565.

Sur les droites appartenant à une surface à sections elliptiques. Simon Stevin 26, 12-14 (1948). (Piazzolla-Beloch) 10-474.

Une représentation des transformations birationnelles du plan et de l'espace. Acad. Roy. Belgique. Cl. Sci. Mém. Coll. in 8^o. (2) 24, no. 2, 31 pp. (1949). (Gauthier) 11-739.

Géométrie algébrique. Sciences et Lettres. Liège. Tome 1, 236 pp., 1948; tome 2, 210 pp., (1949). (Du Val) 12-124.

Correspondances entre deux courbes algébriques. Mémor. Sci. Math., no. 111. Gauthier-Villars, Paris, 1949. 64 pp. (Scott) 12-632.

Sur les points de diramation isolés des surfaces multiples. I. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 15-30 (1949). (Togliatti) 10-735.

Sur une représentation des transformations birationnelles de l'espace. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 92-96 (1949). (Gauthier) 10-735.

Sur les points de diramation isolés des surfaces multiples. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 270-284 (1949). (Togliatti) 11-205.

Sur les points de diramation isolés des surfaces multiples. III. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 285-292 (1949). (Togliatti) 11-205.

Remarques sur les surfaces algébriques irrégulières. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 464-469 (1949). (Conforto) 11-614.

Sur les points de diramation isolés des surfaces multiples. IV. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 532-541 (1949). (Togliatti) 11-392.

Sur les points de diramation isolés des surfaces multiples. V. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 636-641 (1949). (Togliatti) 11-393.

Sur la construction de surfaces non rationnelles de genres zéro. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 688-693 (1949). 11-393.

Sur les points de diramation isolés des surfaces multiples. VI. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 828-833 (1949). (Togliatti) 11-538.

Sur les points de diramation isolés des surfaces multiples. VII. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 834-840 (1949). (Togliatti) 11-538.

Sur la construction de surfaces algébriques dont le diviseur de Severi est quelconque. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 919-923 (1949). (Gauthier) 11-685.

Sur la détermination du système canonique de certaines surfaces algébriques. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 966-970 (1949). 11-458.

Remarques sur la construction de surfaces algébriques non rationnelles de genres zéro. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 35, 971-975 (1949). 11-458.

Sur certaines surfaces multiples n'ayant qu'un nombre fini de points de diramation. Ann. Mat. Pura. Appl. (4) 28, 89-106 (1949). (Gauthier) 12-737.

Sulla costruzione di certe superficie algebriche irregolari. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 6, 694-696 (1949). (Gauthier) 11-685.

Sur les transformations de Jonquières involutives. Bull. Soc. Roy. Sci. Liège 18, 9-19 (1949). 10-736.

Sur les variétés de Segre généralisées. Bull. Soc. Roy. Sci. Liège 18, 20-24 (1949). (Bomplani) 10-735.

Exemple de la détermination de la singularité d'une surface multiple en un point de diramation isolé. Bull. Soc. Roy. Sci. Liège 18, 38-45 (1949). 10-736.

Sur un procédé de construction de transformations birationnelles hyperspatiales. Časopis Pěst. Mat. Fys. 73, 121-130 (1949). (French. Czech summary) (Togliatti) 10-623.

Applications de la théorie des involutions cycliques appartenant à une surface algébrique. Colloque de géométrie algébrique, Liège, 1949, pp. 177-195. Georges Thone, Liège; Masson et Cie., Paris, 1950. 12-125.

Structure des points de diramation d'une surface multiple d'ordre 29. Acad. Roy. Belgique. Cl. Sci. Mém. Coll. in 8^o. (2) 24, no. 7 (1957), 36 pp. (1950). (Du Val) 12-737.

Surfaces algébriques s'osculant le long de courbes. III^e Congrès National des Sciences, Bruxelles, 1950, Vol. 2,

pp. 97-99. Fédération belge des Sociétés Scientifiques, Bruxelles. 16-1047.

Construction de surfaces algébriques irrégulières. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 14-22 (1950). 11-458.

Involutions irrégulières appartenant à la surface des couples de points d'une courbe algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 102-112 (1950). 11-739.

Sur le calcul des invariants d'une surface multiple ayant un nombre fini de points de diramation. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 170-179 (1950). (Gauthier) 11-739.

Étude de certains points de diramation isolés de surfaces multiples. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 368-382 (1950). (Gauthier) 12-738.

Sur la structure des points unis d'une involution appartenant à la surface des couples de points d'une courbe algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 383-387 (1950). 12-277.

Sur le plan double dont la courbe de diramation se compose de trois coniques. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 669-671 (1950). (d'Orgeval) 12-633.

Sur un point de diramation heptuple d'une surface multiple. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 672-677 (1950). (Togliatti) 12-738.

Sur les courbes tracées sur une surface multiple. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 678-682 (1950). (Togliatti) 12-737.

Sur quelques surfaces algébriques de diviseur trois. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 803-808 (1950). 12-529.

Sur les homographies cycliques dont la période est une puissance de deux. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 36, 853-858 (1950). (J. A. Todd) 12-738.

Détermination des singularités d'une surface multiple en certains points de diramation. Ann. Sci. École Norm. Sup. (3) 67, 1-13 (1950). (Gauthier) 12-737.

Sur la variété des cordes d'une courbe rationnelle normale. Bull. Soc. Roy. Sci. Liège 19, 9-14 (1950). 11-739.

Sur une surface multiple possédant des points de diramation quintuples. Bull. Soc. Roy. Sci. Liège 19, 83-96 (1950). (Du Val) 12-278.

Remarques sur les surfaces inscrites dans une surface cubique. Bull. Soc. Roy. Sci. Liège 19, 150-157 (1950). (Du Val) 12-277.

Sur le système canonique de certaines surfaces de genre linéaire un. Bull. Soc. Roy. Sci. Liège 19, 204-212 (1950). (Du Val) 12-277.

Sur la structure de certains points de diramation de surfaces multiples. Bull. Soc. Roy. Sci. Liège 19, 369-378 (1950). (d'Orgeval) 12-855.

Remarque sur la jacobienne d'un système de surfaces. Bull. Soc. Roy. Sci. Liège 19, 379-381 (1950). 12-738.

Étude de quelques surfaces algébriques. Bull. Soc. Roy. Sci. Liège 19, 448-468 (1950). 12-738.

L'état actuel des recherches mathématiques en Belgique. Bull. Soc. Roy. Sci. Liège 19, 514-524 (1950). 13-1.

Les transformations birationnelles et leurs représentations. Časopis Pěst. Mat. Fys. 75, D31-D49 (1950). (Czech. French summary). 12-529.

Sur une courbe algébrique gauche du sixième ordre. Mathesis 59, 156-161 (1950). (Du Val) 12-277.

Sur la jacobienne d'un réseau de courbes algébriques. Mathesis 59, 297-299 (1950). 12-438.

Sur une propriété des quadriques. Simon Stevin 27, 65-68 (1950). (van der Kulk) 11-612.

Osservazioni sui punti uniti delle involuzioni cicliche appartenenti ad una superficie algebrica. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 9, 70-73 (1950). (Du Val) 12-529.

Sur les surfaces associées à une suite de Laplace terminée. Colloque de Géométrie Différentielle, Louvain, 1951, pp. 191-203. Georges Thone, Liège; Masson & Cie, Paris, 1951. (Hsiung) 13-774.

Recherches sur les points de diramation des surfaces multiples. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 111-120 (1951). (Gauthier) 14-76.

Sur les courbes-base d'un système linéaire de surfaces. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 202-206 (1951). 12-737.

Remarques sur les surfaces du quatrième ordre contenant une sextique de genre trois. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 419-426 (1951). (Du Val) 13-488.

Sur quelques surfaces algébriques représentant des involutions cycliques. I. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 819-825 (1951). (Gauthier) 14-199.

Sur quelques surfaces algébriques représentant des involutions cycliques. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 826-835 (1951). (Gauthier) 14-199.

Remarques sur la représentation des transformations birationnelles planes. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 836-849 (1951). (Gauthier) 14-312.

Sur quelques surfaces algébriques représentant des involutions cycliques. III. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 938-949 (1951). (Gauthier) 14-199.

Sur quelques surfaces algébriques représentant des involutions cycliques. IV. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 37, 1106-1119 (1951). (Gauthier) 14-199.

Sopra alcune superficie algebriche dell'iperspazio. Ann. Univ. Ferrara. Parte I. 8 (1948-50), 157-163 (1951). 14-402.

Sur la construction de surfaces irrégulières. Boll. Un. Mat. Ital. (3) 6, 277-280 (1951). (d'Orgeval) 14-201.

Les recherches mathématiques en Belgique dans ces dernières années. Bull. Soc. Math. Belgique 3(1949-1950), 32-40 (1951). 13-197.

Points de diramation des surfaces multiples. Bull. Soc. Math. Belgique 3 (1949-1950), 41-45 (1951). 13-156.

Remarque sur les tétraèdres de Moebius. Bull. Soc. Roy. Sci. Liège 20, 14-15 (1951). 12-731.

Obituary: Federigo Enriques (1871-1946). Bull. Soc. Roy. Sci. Liège 20, 77-85 (1951). 13-197.

Sur certaines transformations monoïdales et leur représentation. Bull. Soc. Roy. Sci. Liège 20, 143-157 (1951). (Gauthier) 13-770.

Sur les tétraèdres de Moebius. Bull. Soc. Roy. Sci. Liège 20, 464-470 (1951). 13-767.

Sur la construction de certaines quartiques rationnelles. Mathesis 60, 81-84 (1951). 12-737.

Sur les points d'Eckardt d'une surface algébrique. Mathesis 60, 253-256 (1951). 13-488.

Sur certaines surfaces algébriques possédant des points doubles uniplanaires. Revista Mat. Hisp.-Amer. (4) 11, 121-128 (1951). (Huff) 13-679.

Sur les surfaces algébriques d'ordre n dont les adjointes d'ordre $n-4$ possèdent une partie fixe. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 10, 45-56 (1951). (Du Val) 13-977.

Mémoire sur les surfaces multiples. Acad. Roy. Belgique Cl. Sci. Mém. Coll. in 8° (2) 27, no. 1626, 80 pp. (1952). (Du Val) 14-578.

Les singularités des points de diramation isolés des surfaces multiples. Deuxième Colloque de Géométrie Algébrique, Liège, 1952, pp. 225-241. Georges Thone, Liège; Masson & Cie, Paris, 1952. (Du Val) 14-897.

Sur la singularité d'une surface multiple en un point de diramation. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 50-70 (1952). (Togliatti) 14-77.

Sur les systèmes canoniques et pluricanoniques d'une surface de genre linéaire un. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 234-243 (1952). (Togliatti) 14-76.

Sur quelques involutions rationnelles appartenant à une surface algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 244-252 (1952). 13-865.

Sur quelques involutions rationnelles appartenant à une surface algébrique. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 426-436 (1952). 14-76.

Sur quelques points de diramation de seconde espèce et de troisième catégorie d'une surface multiple. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 755-765 (1952). (Du Val) 14-579.

Une généralisation des surfaces desmiques. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 892-897 (1952). 14-579.

Sur quelques points de diramation de seconde espèce et de troisième catégorie d'une surface multiple. II. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 898-907 (1952). (Du Val) 14-897.

Observations sur les points unis de seconde espèce et de troisième catégorie des involutions cycliques appartenant à une surface algébrique. Acad. Roy. Belgique. Bull. Cl. Sci. (5) 38, 1118-1124 (1952). 14-898.

Orthogonal polynomials in the least squares fitting of observations. *Philos. Mag.* (7) 41, 124-137 (1950). (Greville) 11-692.

The fitting of polynomials by the method of weighted grouping. *Ann. Math. Statistics* 22, 537-548 (1951). (R. L. Anderson) 13-481.

The estimation of standard error from successive finite differences. *J. Roy. Statist. Soc. Ser. B*, 13, 233-237 (1951). (Whittle) 14-64.

Curve-fitting by the method of grouping. *Australian J. Sci. Research. Ser. A*, 5, 238-257 (1952). (R. L. Anderson) 14-321.

On the standard errors in the fitting of polynomials to unequally spaced observations. *Australian J. Physics* 6, 131-154 (1953). (R. L. Anderson) 15-163.

The Doolittle method and the fitting of polynomials to weighted data. *Biometrika* 40, 229-231 (1953). (R. L. Anderson) 14-1127.

Note on the fitting of polynomials to equally-spaced observations. *J. Math. Physics* 32, 68-71 (1953). (R. L. Anderson) 14-906.

Grouping methods in the fitting of polynomials to equally spaced observations. *Biometrika* 41, 62-76 (1954). (Anderson) 15-991.

Grouping methods in the fitting of polynomials to unequally spaced observations. *Biometrika* 43 (1956), 149-160. (R. L. Anderson) 17-1219.

The spacing of observations in polynomial regression. *Ann. Math. Statist.* 29 (1958), 294-299. (R. L. Anderson) 20-1392.

Gugenheim, V. K. A. M.

Some theorems on piecewise linear embedding. *Proc. Nat. Acad. Sci. U. S. A.* 38, 333-337 (1952). (Fox) 14-74.

Piecewise linear isotopy and embedding of elements and spheres. I, II. *Proc. London Math. Soc.* (3) 3, 29-53, 129-152 (1953). (R. H. Fox) 15-336.

On supercomplexes. *Trans. Amer. Math. Soc.* 85 (1957), 35-51. (J.-P. Meyer) 19-159.

---- and Moore, J. C.

Acyclic models and fibre spaces. *Trans. Amer. Math. Soc.* 85 (1957), 265-306. (W. S. Massey) 19-160.

---- and Spencer, D. C.

Chain homotopy and the de Rham theory. *Proc. Amer. Math. Soc.* 7 (1956), 144-152. (M. P. Gaffney) 19-310.

Guggenheim, E. A. (See also Fowler, R. H.)

Note on magnetic energy. *Phys. Rev.* (2) 68, 273-276 (1945). (Kikuchi) 7-270.

---- and McGlashan, M. L.

Statistical mechanics of regular mixtures. *Proc. Roy. Soc. London. Ser. A*, 206, 335-353 (1951). (Luttinger) 12-892.

Guggenheimer, Heinrich. (See also Eckmann, Beno)

Über komplex-analytische Mannigfaltigkeiten mit Kählerscher Metrik. *Comment. Math. Helv.* 25, 257-297 (1951). (Chern) 13-781.

Sur les variétés qui possèdent une forme extérieure quadratique fermée. *C. R. Acad. Sci. Paris* 232, 470-472 (1951). (Hodge) 12-535.

Quelques propriétés des variétés kählériennes closes. *C. R. Acad. Sci. Paris* 232, 1398-1400 (1951). (Hodge) 13-75.

A note on curvature and Betti numbers. *Proc. Amer. Math. Soc.* 2, 867-870 (1951). (W. V. D. Hodge) 13-584.

Über vierdimensionale Einsteinräume. *Experientia* 8, 420-421 (1952). (Chern) 14-498.

Ueber kählersche und symplektische Differentialalgebren. *Tôhoku Math. J.* (2) 4, 157-171 (1952). (Hodge) 14-585.

Geometria pseudo-kähleriana. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 14, 220-222 (1953). (Hodge) 15-63.

Geometria pseudo-kähleriana. II. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 15, 271-274 (1953). (W. V. D. Hodge) 16-172.

Vierdimensionale Einsteinräume. *Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl.* (5) 11 (1952), 362-373 (1953). (Chern) 15-742.

Topologia differenziale delle trasformazioni cremoniane e delle riemanniane di funzioni di più variabili complesse. *Convegno Internazionale di Geometria Differenziale, Italia, 1953*, pp. 222-228. Edizioni Cremonese, Roma, 1954. (R. C. Gunning) 16-172.

Formes et vecteurs pseudo-analytiques. *Ann. Mat. Pura Appl.* (4) 36, 223-246 (1954). (Bochner) 15-899.

Interpretazione topologica dei convarianti di Beniamino Segre. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 16, 331-334 (1954). (W. V. D. Hodge) 16-617.

Omologia delle dilatazioni. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 17, 13-15 (1954). (W. V. D. Hodge) 16-617.

Quelques remarques concernant l'article de M. Alexandre Wittenberg: Über adäquate Problemstellung in der mathematischen Grundlagenforschung. *Dialektica* 8, 145-146 (1954). (Heyting) 16-437.

Sopra una successione esatta e sulle modificazioni delle varietà kähleriane di dimensione quattro. *Boll. Un. Mat. Ital.* (3) 10, 153-160 (1955). (R. C. Gunning) 17-85.

Nonseparable convex systems. Amer. Math. Monthly 54, 583-585 (1947). (Fejes Tóth) 9-372.

Multikongruenz ebener Mengen und Pythagoreischer Lehrsatz. Bull. École Polytech. Jassy [Bul. Politehn. Gh. Asachi. Iași] 2, 98-105 (1947). (Blumberg) 10-105.

Eine Erweiterung eines Theorems von Steinhaus-Rademacher. Comment. Math. Helv. 19, 236-239 (1947). (Erdős) 8-255.

Die Retardierungserscheinung bei Potenzreihen und Ermittlung zweier Konstanten Tauberscher Art. Comment. Math. Helv. 20, 319-332 (1947). (Agnew) 9-86.

Über eine symbolischtopologische Formel. Elemente der Math. 2, 35-41 (1947). (Busemann) 8-484.

Une mesurabilité moyenne pour les ensembles de points. Fund. Math. 34, 293-305 (1947). (Federer) 10-360.

Bemerkung zu einer Grössenrelation bei Punktmengen. Portugaliae Math. 6, 45-48 (1947). (Ward) 9-178.

Über eine Konstante Tauberscher Art. Revista Mat. Hisp.-Amer. (4) 7, 65-69 (1947). (Agnew) 9-86.

Der Begriff der Ultrafunktion. Vierteljahr. Naturforsch. Ges. Zürich 92, 31-42 (1947). (Hille) 8-569.

Zum Problem des vollständigen Ungleichungssystems bei konvexen Körpern. Arch. Math. 1, 13-17 (1948). (Fenchel) 10-205.

Die isoperimetrische Ungleichung im Raum. Elemente der Math. 3, 25-38 (1948). (Fenchel) 9-526.

Kurzer Beweis der isoperimetrischen Ungleichung für konvexe Bereiche. Elemente der Math. 3, 111-112 (1948). (Busemann) 10-321.

Notiz zur fehlenden Ungleichung in der Theorie der konvexen Körper. Elemente der Math. 3, 112-113 (1948). (Fenchel) 10-395.

On a symbolic topological formula. Gaz. Mat., Lisboa 9, no. 35, 6-9 (1948). (Portuguese) 9-526.

Sur le déficit isopérimétrique d'un polygone formé par des arcs de cercle. Gaz. Mat., Lisboa 9, no. 36, 1-2 (1948). (Busemann) 10-141.

Über die Zerstückung eines Eikörpers. Math. Z. 51, 161-165 (1948). (Fenchel) 10-59.

Beweis einer Extremaleigenschaft der symmetrischen Kogelzone. Portugaliae Math. 7, 73-85 (1948). (Fenchel) 10-471.

An integral mean value for the Euler characteristic for movable ovals. Revista Union Mat. Argentina 13, 66-72 (1948). (Spanish) (Busemann) 10-141.

Remarque sur la décomposition des ensembles de même mesure en parties (respectivement) congruentes. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 40 (1947), 50-55 (1948). (French. Polish summary) (Randolph) 13-121.

Die Multikongruenz und der Satz von Banach und Tarski. Abh. Math. Sem. Univ. Hamburg 16, nos. 1-2, 48-53 (1949). (Blumberg) 11-238; 871.

Zerlegungsgleichheit und additive Polyederfunktionale. Arch. Math. 1, 468-472 (1949). (Blumberg) 11-165.

Einige einfache Sätze über Distanzmittel bei konvexen Körpern. Bul. Inst. Politech. Iași 4 (1949), 30-35. (H. Busemann) 20#268.

Bemerkung zur elementaren Inhaltslehre des Raumes. Elemente der Math. 4, 3-7 (1949). (Busemann) 10-564.

Elementare Studie über konvexe Rotationskörper. Math. Nachr. 2, 114-123 (1949). (Fenchel) 11-127.

Über konvexe Körper mit Flachstellen. Math. Z. 52, 212-216 (1949). (Busemann) 11-200.

Über Masszahlen und Ungleichungen bei Mittelpunktseikörpern. Monatsh. Math. 53, 132-137 (1949). (Fenchel) 11-51.

Ein Auswahlssatz für abgeschlossene Punktmengen. Portugaliae Math. 8, 13-15 (1949). (Busemann) 11-165.

Beweis der isoperimetrischen Ungleichung für abgeschlossene Punktmengen. Portugaliae Math. 8, 89-93 (1949). (Fenchel) 12-353.

Über beschränkte additive Funktionale konvexer Polygone. Publ. Math. Debrecen 1, 104-108 (1949). (Busemann) 12-124.

Kurze Herleitung einer verschärften isoperimetrischen Ungleichung für konvexe Körper. Rev. Fac. Sci. Univ. Istanbul (A) 14, 1-6 (1949). (German. Turkish summary) (L. C. Young) 10-731.

Elementare Ermittlung extremer Rotationskörper. Revista Mat. Hisp.-Amer. (4) 9, 59-70 (1949). (Fenchel) 11-680.

Neue Integralrelationen für Eikörperpaare. Acta Univ. Szeged. Sect. Sci. Math. 13, 252-257 (1950). (Coxeter) 12-526.

Translative Zerlegungsgleichheit k-dimensionaler Parallelepe. Collectanea Math. 3, 11-23 (1950). (Jessen) 13-768.

Zur Inhaltstheorie der Polyeder. Collectanea Math. 3, 137-158 (1950). (Jessen) 13-154.

Zerlegungsgleichheit und additive Polyederfunktionale. Comment. Math. Helv. 24, 204-218 (1950). (Jessen) 12-526.

Studie zu einer Funktionalgleichung. Elemente der Math. 5, 86-88 (1950). (Guenther) 12-416.

Neue Ungleichungen für konvexe Rotationskörper. Math. Ann. 122, 175-180 (1950). (Fenchel) 12-526.

Minkowskische Addition und Subtraktion beliebiger Punktmengen und die Theoreme von Erhard Schmidt. Math. Z. 53, 210-218 (1950). (Scherk) 12-631.

Einige Anwendungen eines Funktionalsatzes für konvexe Körper in der räumlichen Integralgeometrie. Monatsh. Math. 54, 345-353 (1950). (Busemann) 12-734.

Beweis eines Funktionalsatzes für konvexe Körper. Abh. Math. Sem. Univ. Hamburg 17, 69-76 (1951). (Chern) 12-851.

Zum Problem der Zerlegungsgleichheit der Polyeder. Arch. Math. 2 (1949-1950), 441-444 (1951). (Busemann) 13-377.

Über die Jordansche Messbarkeit von Vereinigung und Durchschnitt beliebig vieler Punktmengen. Compositio Math. 9, 80-84 (1951). (Eggleston) 12-685.

Hillsche Hypertetraeder. Gaz. Mat., Lisboa 12, no. 50, 47-48 (1951). (Busemann) 14-198.

Der Würfel als Körper kleinster Relativoberfläche. Jber. Deutsch. Math. Verein. Abt. 1, 55, 9-14 (1951). (Busemann) 13-271.

Zur Minkowskischen Dimensions und Massbestimmung beschränkter Punktmengen des euklidischen Raumes. Math. Nachr. 4, 202-212 (1951). (Busemann) 12-631.

Verschärfte isoperimetrische Ungleichung für konvexe Rotationskörper mit Spitzen. Math.-Phys. Semesterber. 2, 98-103 (1951). (Gustin) 12-632.

Einfache Herleitung der isoperimetrischen Ungleichung für abgeschlossene Punktmengen. *Math. Ann.* 124, 158-160 (1952). (Scherk) 14-198.

Translationsinvariante, additive und stetige Eibereichfunktionale. *Publ. Math. Debrecen* 2, 81-94 (1951). (Busemann) 13-971.

Einige neue Ergebnisse über extremale konvexe Rotationskörper. *Abh. Math. Sem. Univ. Hamburg* 18, 38-52 (1952). (Scherk) 14-787.

Ueber zwei quadratische Distanzintegrale für Eikörper. *Arch. Math.* 3, 142-144 (1952). (Chern) 14-198.

Translationsinvariante, additive und schwachstetige Polyederfunktionale. *Arch. Math.* 3, 387-394 (1952). (Jessen) 14-964.

Additive Funktionale k-dimensionaler Eikörper. I. *Arch. Math.* 3, 470-478 (1952). (Jessen) 14-1114.

Einlagerung kongruenter Kugeln in eine Kugel. *Elemente der Math.* 7, 97-103 (1952). (Coxeter) 14-310.

Mittelpunktpolyeder und translative Zerlegungsgleichheit. *Math. Nachr.* 8, 53-58 (1952). (Jessen) 14-309.

Ergänzungsgleichheit k-dimensionaler Polyeder. *Math. Z.* 55, 292-298 (1952). (Jessen) 14-309.

Über eine Ungleichung für drei Minkowskische Masszahlen bei konvexen Rotationskörpern. *Monatsh. Math.* 56, 220-228 (1952). (Fejes Tóth) 14-495.

Ueber addierbare Intervallfunktionale. *Tōhoku Math. J.* (2) 4, 33-37 (1952). (Halmos) 14-28.

Additive Funktionale k-dimensionaler Eikörper. II. *Arch. Math.* 4, 374-379 (1953). (Jessen) 15-551.

Lineare additive Polyederfunktionale und Zerlegungsgleichheit. *Math. Z.* 58, 4-14 (1953). (Jessen) 14-964.

Über Gitter und Polyeder. *Monatsh. Math.* 57, 246-254 (1953). (Jessen) 15-551.

Zur isoperimetrischen Ungleichung für k-dimensionale konvexe Polyeder. *Nagoya Math. J.* 5, 39-44 (1953). (Fejes Tóth) 14-679.

Deckungsäquivalenz und Zerlegungsäquivalenz bei Funktionen in abstrakten Räumen und invariante Integration. *Arch. Math.* 5, 115-122 (1954). (Jessen) 16-345.

Zur Zerlegungstheorie euklidischer Polyeder. *Ann. Mat. Pura Appl.* (4) 36, 315-334 (1954). (Jessen) 16-396.

Absolut messbare Punktmengen im euklidischen Raum. *Comment. Math. Helv.* 28, 119-148 (1954). (Halmos) 16-22.

Kurze Herleitung der isoperimetrischen Eigenschaft der Kugel. *Elemente der Math.* 9, 97-101 (1954). 16-65.

Von der Zerlegung der Kugel in kleinere Teile. *Gaz. Mat., Lisboa* 15, no. 57, 1-3 (1954). (German and Portuguese) (Blumenthal) 15-982.

Zum Problem der Zerlegungsgleichheit k-dimensionaler Polyeder. *Math. Ann.* 127, 170-174 (1954). (Jessen) 15-691.

Oberflächenwellen in energieverzehrenden Medien. *Ann. Geofis.* 7, 143-193 (1954). (Noll) 16-650.
Über die Entstehung der Mikroseismik. *Z. Geophys.* 23 (1957), 83-112. (A. Blake) 19-512.

Hardy, Arthur C.

---- and Dench, Edward C.

An electronic method for solving simultaneous equations.

J. Opt. Soc. Amer. 38, 308-312 (1948). (Hamming) 9-535.

Hardy, G. H. (=Hardi; Gardi) (See also Aronszajn, N., Carslaw, H. S.)

A note on a differential equation. Proc. Cambridge Philos. Soc. 35, 652-653 (1939). (W. M. Whyburn) 1-75; 16-1336.

A Mathematician's Apology. Cambridge University Press, Cambridge, England; Macmillan Company, New York, 1940. vii + 93 pp. (Pólya) 2-210.

Ramanujan. Twelve lectures on subjects suggested by his life and work. Cambridge University Press, Cambridge, England; Macmillan Company, New York, 1940. vii + 236 pp. (Rademacher) 3-71.

Notes on special systems of orthogonal functions (III): A system of orthogonal polynomials. Proc. Cambridge Philos. Soc. 36, 1-8 (1940). (Bateman) 1-141.

A double integral. J. London Math. Soc. 16, 89-94 (1941). (Boas) 3-38.

Note on a divergent series. Proc. Cambridge Philos. Soc. 37, 1-8 (1941). (Levinson) 2-278.

Notes on special systems of orthogonal functions. IV. The orthogonal functions of Whittaker's cardinal series. Proc. Cambridge Philos. Soc. 37, 331-348 (1941). (Bateman) 3-108.

Note on Lebesgue's constants in the theory of Fourier series. J. London Math. Soc. 17, 4-13 (1942). (Zygmund) 4-36.

Obituary: William Henry Young. J. London Math. Soc. 17, 218-237 (1942). 5-58.

An inequality for Hausdorff means. J. London Math. Soc. 18, 46-50 (1943). (R. P. Agnew) 5-65.

Obituary: William Henry Young. 1863-1942. Obit. Notices Roy. Soc. London 4, 307-323 (1943). 6-254.

Note on the multiplication of series by Cauchy's rule. Proc. Cambridge Philos. Soc. 40, 251-252 (1944). (Agnew) 6-149.

Riemann's form of Taylor's series. J. London Math. Soc. 20, 48-57 (1945). (Schoenberg) 8-65.

A double integral. J. London Math. Soc. 22 (1947), 242-247 (1948). (L. Schwartz) 10-35.

Divergent Series. Oxford, at the Clarendon Press, 1949. xvi + 396 pp. (Agnew) 11-25.

Some aspects of Hardy's mathematical work. J. London Math. Soc. 25, 102-138 (1950). 12-69.

Rashodyaščiesya ryady. [Divergent series.] Translated by D. A. Raikov, with a preface and survey article by S. B. Stečkin. Izdat. Inostrannoi Literatury, Moscow, 1951. 504 pp. (Agnew) 16-690.

A course of pure mathematics. 10th ed. Cambridge, at the University Press, 1952. xii + 509 pp. 14-145.

---- and Littlewood, J. E.

Theorems concerning mean values of analytic or harmonic functions. Quart. J. Math., Oxford Ser. 12, 221-256 (1941). (Boas) 4-8.

Notes on the theory of series. XXII. On the Tauberian theorem for Borel summability. J. London Math. Soc. 18, 194-200 (1943). (Agnew) 6-46.

Note on the theory of series. XXIII. On the partial sums of Fourier series. Proc. Cambridge Philos. Soc. 40, 103-107 (1944). (Zygmund) 6-47.

Notes on the theory of series. XXIV. A curious power-series. Proc. Cambridge Philos. Soc. 42, 85-90 (1946). (Salem) 7-433.

A new proof of a theorem on rearrangements. J. London Math. Soc. 23, 163-168 (1948). (Salem) 10-448.

---- and Rogosinski, W. W.

Notes on Fourier series. I. On sine series with positive coefficients. J. London Math. Soc. 18, 50-57 (1943). (H. Pollard) 5-65.

Notes of Fourier series. II. On the Gibbs phenomenon. J. London Math. Soc. 18, 83-87 (1943). (Pollard) 5-118.

Fourier Series. Cambridge Tracts in Mathematics and Mathematical Physics, no. 38. Cambridge University Press, 1944. 100 pp. (Pollard) 5-261.

Notes on Fourier series. III. Asymptotic formulae for the sums of certain trigonometrical series. Quart. J. Math., Oxford Ser. 16, 49-58 (1945). (Pollard) 7-247.

Theorems concerning functions subharmonic in a strip. Proc. Roy. Soc. London. Ser. A. 185, 1-14 (1946). (Wolf) 7-448.

Notes on Fourier series. IV. Summability (R_2). Proc. Cambridge Philos. Soc. 43, 10-25 (1947). (Wolf) 8-376.

Notes on Fourier series. V. Summability (R_1). Proc. Cambridge Philos. Soc. 45, 173-185 (1949). (Zygmund) 10-528.

Fourier series. 2nd ed. Cambridge Tracts in Mathematics and Mathematical Physics, no. 38. Cambridge, At the University Press, 1950. x + 100 pp. 13-457.

---- and Wright, E. M.

An introduction to the theory of numbers. 3rd ed. Oxford, at the Clarendon Press, 1954. xvi + 419 pp. (de Bruijn) 16-673.

Einführung in die Zahlentheorie. Übersetzt von H. Ruoff. R. Oldenbourg, München, 1958. xvi + 480 pp. 20-828.

---- and Littlewood, J. E.; i Pólya, G.

Neravenstva. [Inequalities.] Gosudarstv. Izdat. Inostr. Lit., Moscow, 1948. 456 pp. (R. P. Boas, Jr.) 18-722.

Inequalities. 2d ed. Cambridge, at the University Press, 1952. xii + 324 pp. 13-727.

Hare, A. See Cowling, T. G.

Hargest, T. J.

An electric tank for the determination of theoretical velocity distributions. Ministry of Supply [London], Aeronaut. Res. Council, Rep. and Memoranda no. 2699 (12, 448), 9 pp. (1952). 14-211.

Haridas Banerjee. See Banerjee.

Harington, C. F.

---- and Hyslop, J. M.

An analogue for strong summability of Abel's summability method. Proc. Edinburgh Math. Soc. (2) 9, 28-34 (1953). (Agnew) 15-617.

Haringx, J. A.

On the bucking and the lateral rigidity of helical compression springs. I, II. Nederl. Akad. Wetensch., Proc. 45, 533-539, 650-654 (1942). 5-251.

Non-linearity of corrugated diaphragms. Appl. Sci. Res. A. 6 (1956), 45-52. (R. Gran Olsson) 17-1254.

Harish-Chandra. (=Chandra, Harish-) (See also Bhabha, H. J.)

On the removal of the infinite self-energies of point-particles. Proc. Roy. Soc. London. Ser. A. 183, 142-167 (1944). (Weiss) 7-538.

On the scattering of scalar mesons. Proc. Indian Acad. Sci. Sect. A. 21, 135-146 (1945). (Feshbach) 8-124.

Algebra of the Dirac-matrices. Proc. Indian Acad. Sci., Sect. A. 22, 30-41 (1945). (Wigner) 7-233.

A note on the σ -symbols. Proc. Indian Acad. Sci., Sect. A. 23, 152-163 (1946). (Schwartz) 7-537.

On the equations of motion of point particles. Proc. Roy. Soc. London. Ser. A. 185, 269-287 (1946). (Weiss) 7-538.

The correspondence between the particle and the wave aspects of the meson and the photon. Proc. Roy. Soc. London. Ser. A. 186, 502-525 (1946). (Kusaka) 8-302.

On relativistic wave equations. Physical Rev. (2) 71, 793-805 (1947). (Kusaka) 8-554.

On the algebra of the meson matrices. Proc. Cambridge Philos. Soc. 43, 414-421 (1947). (Givens) 9-171.

Infinite irreducible representations of the Lorentz group. Proc. Roy. Soc. London. Ser. A. 189, 372-401 (1947). (Wigner) 9-132.

Motion of an electron in the field of a magnetic pole. Physical Rev. (2) 74, 883-887 (1948). (Strachan) 10-582.

Relativistic equations for elementary particles. Proc. Roy. Soc. London. Ser. A. 192, 195-218 (1948). (Taub) 9-557.

Faithful representations of Lie algebras. Ann. of Math. (2) 50, 68-76 (1949). (Smith) 10-504.

On representations of Lie algebras. Ann. of Math. (2) 50, 900-915 (1949). (Godement) 11-77.

Lie algebras and the Tannaka duality theorem. *Ann. of Math.* (2) 51, 299-330 (1950). (Godement) 11-492.

On the radical of a Lie algebra. *Proc. Amer. Math. Soc.* 1, 14-17 (1950). (Godement) 11-491.

On faithful representations of Lie groups. *Proc. Amer. Math. Soc.* 1, 205-210 (1950). (P. A. Smith) 11-579.

Representations of semisimple Lie groups on a Banach space. *Proc. Nat. Acad. Sci. U.S.A.* 37, 170-173 (1951). (Mautner) 13-106.

Representations of semisimple Lie groups. II. *Proc. Nat. Acad. Sci. U.S.A.* 37, 362-365 (1951). (Mautner) 13-107.

Representations of semisimple Lie groups. III. Characters. *Proc. Nat. Acad. Sci. U.S.A.* 37, 366-369 (1951). (Mautner) 13-107.

Representations of semisimple Lie groups. IV. *Proc. Nat. Acad. Sci. U.S.A.* 37, 691-694 (1951). (Mautner) 13-107.

Plancherel formula for complex semisimple Lie groups. *Proc. Nat. Acad. Sci. U.S.A.* 37, 813-818 (1951). (Mautner) 13-533.

On some applications of the universal enveloping algebra of a semisimple Lie algebra. *Trans. Amer. Math. Soc.* 70, 28-96 (1951). (Godement) 13-428.

Plancherel formula for the 2×2 real unimodular group. *Proc. Nat. Acad. Sci. U.S.A.* 38, 337-342 (1952). (Mackey) 13-820.

Representations of a semisimple Lie group on a Banach space. I. *Trans. Amer. Math. Soc.* 75, 185-243 (1953). (Mautner) 15-100.

On the Plancherel formula for the right-invariant functions on a semisimple Lie group. *Proc. Nat. Acad. Sci. U.S.A.* 40, 200-204 (1954). (Mautner) 16-11.

Representations of semisimple Lie groups. V. *Proc. Nat. Acad. Sci. U.S.A.* 40, 1076-1077 (1954). (Mautner) 16-334.

Representations of semisimple Lie groups. VI. *Proc. Nat. Acad. Sci. U.S.A.* 40, 1078-1080 (1954). (Mautner) 16-334.

Representations of semisimple Lie groups. II. *Trans. Amer. Math. Soc.* 76, 26-65 (1954). (Mautner) 15-398.

Representations of semisimple Lie groups. III. *Trans. Amer. Math. Soc.* 76, 234-253 (1954). (Mautner) 16-11.

The Plancherel formula for complex semisimple Lie groups. *Trans. Amer. Math. Soc.* 76, 485-528 (1954). (Mackey) 16-111.

Representations of semisimple Lie groups. IV. *Amer. J. Math.* 77 (1955), 743-777. (F. I. Mautner) 17-282.

On the characters of a semisimple Lie group. *Bull. Amer. Math. Soc.* 61, 389-396 (1955). (F. I. Mautner) 17-173.

Integrable and square-integrable representations of a semisimple Lie group. *Proc. Nat. Acad. Sci. U.S.A.* 41, 314-317 (1955). (F. I. Mautner) 17-60.

Representations of semisimple Lie groups. V. *Amer. J. Math.* 78 (1956), 1-41. (F. I. Mautner) 18-490.

Representations of semisimple Lie groups. VI. Integrable and Square-integrable representations. *Amer. J. Math.* 78 (1956), 564-628. (F. I. Mautner) 18-490.

On a lemma of F. Bruhat. *J. Math. Pures Appl.* (9) 35 (1956), 203-210. (K. Iwasawa) 18-137.

Invariant differential operators on a semisimple Lie algebra. *Proc. Nat. Acad. Sci. U.S.A.* 42 (1956), 252-253. (F. I. Mautner) 18-218.

A formula for semisimple Lie groups. *Proc. Nat. Acad. Sci. U.S.A.* 42 (1956), 538-540. (F. I. Mautner) 18-218.

The characters of semisimple Lie groups. *Trans. Amer. Math. Soc.* 83 (1956), 98-163. (F. I. Mautner) 18-318.

Representations of semisimple Lie groups. Proceedings of the International Congress of Mathematicians, Amsterdam, 1954, Vol. 1, pp. 299-304. Erven P. Noordhoff N.V., Groningen; North-Holland Publishing Co., Amsterdam; 1957. 582 pp. (G. W. Mackey) 20#1926.

Differential operators on a semisimple Lie algebra. *Amer. J. Math.* 79 (1957), 87-120. (G. W. Mackey) 18-809.

Fourier transforms on a semisimple Lie algebra. I. *Amer. J. Math.* 79 (1957), 193-257. (F. I. Mautner) 19-293.

A formula for semisimple Lie groups. *Amer. J. Math.* 79 (1957), 733-760. (F. I. Mautner) 20#2633.

Fourier transforms on a semisimple Lie algebra. II. *Amer. J. Math.* 79 (1957), 653-686. (F. I. Mautner) 20#2396.

Spherical functions on a semisimple Lie group. *Proc. Nat. Acad. Sci. U.S.A.* 43 (1957), 408-409. (F. I. Mautner) 19-292.

Spherical functions on a semisimple Lie group. I. *Amer. J. Math.* 80 (1958), 241-310. (G. W. Mackey) 20#925.

The zeros of the derivatives of the real elliptic \wp -function. *Duke Math. J.* 15, 413-420 (1948). (van Veen) 10-115.
Differential equations with non-oscillatory eigenfunctions. *Duke Math. J.* 15, 697-709 (1948). (Levinson) 10-376.
Unrestricted solution fields of almost-separable differential equations. *Trans. Amer. Math. Soc.* 63, 560-580 (1948). (Bellman) 9-589.
On the spectra of slightly disturbed linear oscillators. *Amer. J. Math.* 71, 71-79 (1949). (Levinson) 10-455.
A characterization of the spectra of one-dimensional wave equations. *Amer. J. Math.* 71, 915-920 (1949). (Levinson) 11-438.
On the local uniqueness of geodesics. *Amer. J. Math.* 72, 723-730 (1950). (Fialkow) 12-357.
The number of L^2 -solutions of $x'' + q(x)x = 0$. *Amer. J. Math.* 73, 635-645 (1951). (Levinson) 13-462.
On bounded Green's kernels for second order linear ordinary differential equations. *Amer. J. Math.* 73, 646-656 (1951). (Levinson) 13-463.
On the eigenvalues of differential equations. *Amer. J. Math.* 73, 657-662 (1951). (Levinson) 13-463.
On geodesic coordinates. *Amer. J. Math.* 73, 949-954 (1951). (Fialkow) 13-683.
On linear second order differential equations with small coefficients. *Amer. J. Math.* 73, 955-962 (1951). (Coddington) 13-652.
Some examples in the theory of singular boundary value problems. *Amer. J. Math.* 74, 107-126 (1952). (Coddington) 14-558.
On unsmooth two-dimensional Riemannian metrics. *Amer. J. Math.* 74, 215-226 (1952). (Fialkow) 13-869.
On non-oscillatory linear differential equations of second order. *Amer. J. Math.* 74, 389-400 (1952). (Leighton) 14-50.
On the zeros of solutions of second order linear differential equations. *J. London Math. Soc.* 27, 492-496 (1952). (Leighton) 14-278.
On the derivatives of solutions of linear, second order, ordinary differential equations. *Amer. J. Math.* 75, 173-177 (1953). (Miranda) 14-754.
On the essential spectra of symmetric operators in Hilbert space. *Amer. J. Math.* 75, 229-240 (1953). (Frantisek Wolf) 15-136.
On the essential spectra of ordinary differential operators. *Amer. J. Math.* 76, 831-838 (1954). (Atkinson) 16-478.
On the local behavior of solutions of $\Delta u = g(x, u, \nabla u)$. *Comm. Pure Appl. Math.* 9 (1956), 435-445. (A. Douglis) 18-312.
On Jacobi brackets. *Amer. J. Math.* 79 (1957), 187-189. (P. Lax) 18-806.
Self-adjoint, non-oscillatory systems of ordinary, second order, linear differential equations. *Duke Math. J.* 24 (1957), 25-35. (C. R. Putnam) 18-576.
Hölder continuity and non-linear elliptic partial differential equations. *Duke Math. J.* 25 (1957), 57-65. (R. Finn) 20#4093.
Remarks on a uniqueness theorem for closed surfaces. *Math. Ann.* 133 (1957), 426-430. (H. Busemann) 19-679.
On Laurent operators on l_p . *Proc. Amer. Math. Soc.* 8 (1957), 45-48. (R. E. Fullerton) 19-46.
Perturbation of spectra and Krein extensions. *Rend. Circ. Mat. Palermo* (2) 5 (1956), 341-354 (1957). (R. E. Fullerton) 19-296.
On elliptic partial differential equations and uniqueness theorems for closed surfaces. *J. Math. Mech.* 7 (1958), 377-392. (H. Busemann) 20#4875.
On integrating factors and on conformal mappings. *Trans. Amer. Math. Soc.* 87 (1958), 387-406. (A. Fialkow) 20#1832.
- and Kershner, Richard.
On upper limit relations for number theoretical functions. *Amer. J. Math.* 62, 780-786 (1940). (Zuckerman) 2-42.
- and Sacksteder, Richard.
On maximum principles for non-hyperbolic partial differential operators. *Rend. Circ. Mat. Palermo* (2) 6 (1957), 218-232. (M. H. Protter) 20#3367.

--- and Putnam, Calvin R.

The least cluster point of the spectrum of boundary value problems. *Amer. J. Math.* 70, 849-855 (1948). (Levinson) 10-376.

The gaps in the essential spectra of wave equations. *Amer. J. Math.* 72, 849-862 (1950). (Gottlieb) 12-414.

The essential spectrum and averages of the potential. *Duke Math. J.* 23 (1956), 83-91. (N. Levinson) 17-1210.

The essential spectra belonging to bounded and half-bounded potentials. *Duke Math. J.* 23 (1956), 561-570. (N. Levinson) 18-901.

--- and Wintner, Aurel.

Asymptotic distributions and the ergodic theorem. *Amer. J. Math.* 61, 977-984 (1939). (G. A. Hedlund) 1-59.

Statistical independence and statistical equilibrium. *Amer. J. Math.* 62, 646-654 (1940). (Hedlund) 1-339.

On the standard deviations of additive arithmetical functions. *Amer. J. Math.* 62, 743-752 (1940). (Bochner) 2-42.

On the almost periodicity of additive number-theoretical functions. *Amer. J. Math.* 62, 753-758 (1940). (Bochner) 2-41.

On the spherical approach to the normal distribution law. *Amer. J. Math.* 62, 759-779 (1940). (Doob) 2-107.

On the law of the iterated logarithm. *Amer. J. Math.* 63, 169-176 (1941). (Kac) 2-228.

On the convexity of averages of analytic almost periodic functions. *Amer. J. Math.* 63, 581-583 (1941). (Cameron) 2-362.

On the needle problem of Laplace and its generalizations. *Bol. Mat.* 14, 260-263 (1941). (Kac) 3-169.

On the infinitesimal generators of integral convolutions. *Amer. J. Math.* 64, 273-298 (1942). (Doob) 4-18.

Additive functions and almost periodicity. *Duke Math. J.* 9, 112-119 (1942). (Cameron) 3-270.

Integrability in the large and dynamical stability. *Amer. J. Math.* 65, 273-278 (1943). (Kaplan) 4-226.

On the asymptotic behavior of the solutions of a non-linear differential equation. *Amer. J. Math.* 68, 301-308 (1946). (Levinson) 7-444.

On Möbius' inversion. *Amer. J. Math.* 69, 853-858 (1947). (Bourgin) 9-358.

The (L^2) -space of relative measure. *Proc. Nat. Acad. Sci. U. S. A.* 33, 128-132 (1947). (Jessen) 9-44.

An oscillation theorem for continuous spectra. *Proc. Nat. Acad. Sci. U. S. A.* 33, 376-379 (1947). (Levinson) 9-435.

The asymptotic arc variation of solutions of real linear differential equations of second order. *Amer. J. Math.* 70, 1-10 (1948). (Levinson) 9-435.

Criteria of non-degeneracy for the wave equation. *Amer. J. Math.* 70, 295-308 (1948). (Levinson) 10-120.

On the orientation of unilateral spectra. *Amer. J. Math.* 70, 309-316 (1948). (Levinson) 10-120.

On the asymptotic problems of the zeros in wave mechanics. *Amer. J. Math.* 70, 461-480 (1948). (Levinson) 10-194.

On non-conservative linear oscillators of low frequency. *Amer. J. Math.* 70, 529-539 (1948). (Levinson) 10-194.

On the effect of decimal corrections on errors of observation. *Ann. Math. Statistics* 19, 389-393 (1948). (Wundheiler) 10-155.

Töplerian (L^2) -bases. *Trans. Amer. Math. Soc.* 63, 207-225 (1948). (Bourgin) 9-582.

A criterion for the non-degeneracy of the wave equation. *Amer. J. Math.* 71, 206-213 (1949). (Levinson) 10-455.

On the location of spectra of wave equations. *Amer. J. Math.* 71, 214-217 (1949). (Levinson) 10-455.

On the Laplace-Fourier transcendents. *Amer. J. Math.* 71, 367-372 (1949). (Levinson) 10-711.

Oscillatory and non-oscillatory linear differential equations. *Amer. J. Math.* 71, 627-649 (1949). (Miranda) 11-109.

A separation theorem for continuous spectra. *Amer. J. Math.* 71, 650-662 (1949). (Wasow) 11-109.

On the classical existence theorem of linear differential equations. *Amer. J. Math.* 71, 859-864 (1949). (Mandelbrojt) 11-516.

Separation theorems for bounded Hermitian forms. *Amer. J. Math.* 71, 865-878 (1949). (Nachbin) 11-442.

Derivative bases. *Univ. Nac. Tucumán. Revista A.* 7, 7-14 (1949). (Korevaar) 11-354.

On linear difference equations of second order. *Amer. J. Math.* 72, 124-128 (1950). (Ghizzetti) 11-725.

On the derivatives of the solutions of one-dimensional wave equations. *Amer. J. Math.* 72, 148-156 (1950). (Miranda) 12-179.

On non-linear differential equations of first order. *Amer. J. Math.* 72, 347-358 (1950). (Reuter) 11-594.

On the spectra of Toeplitz's matrices. *Amer. J. Math.* 72, 359-366 (1950). (Nachbin) 12-187.

On the solutions of the equation of heat conduction. *Amer. J. Math.* 72, 367-395 (1950). (Rothe) 12-104.

On the essential spectra of singular eigenvalue problems. *Amer. J. Math.* 72, 545-552 (1950). (Wasow) 12-29.

On the embedding problem in differential geometry. *Amer. J. Math.* 72, 553-564 (1950). (Fialkow) 12-51.

On the fundamental equations of differential geometry. *Amer. J. Math.* 72, 757-774 (1950). (Fialkow) 12-357.

Lamé coordinates in Hilbert space. *Amer. J. Math.* 72, 775-786 (1950). (Miranda) 12-717.

On the Euler transforms. *Proc. Amer. Math. Soc.* 1, 394-396 (1950). (Hirschman) 12-23.

On the problems of geodesics in the small. *Amer. J. Math.* 73, 132-148 (1951). (Fialkow) 12-742.

On the asymptotic curves of a surface. *Amer. J. Math.* 73, 149-172 (1951). (Fialkow) 12-742.

On the classical transcendents of mathematical physics. *Amer. J. Math.* 73, 381-389 (1951). (Hille) 12-705.

On the non-increasing solutions of $y'' = f(x, y, y')$. *Amer. J. Math.* 73, 390-404 (1951). (Scorza-Dracconi) 13-37.

Gaussian curvature and local embedding. *Amer. J. Math.* 73, 876-884 (1951). (Fialkow) 13-683.

On an oscillation criterion of Liapounoff. *Amer. J. Math.* 73, 885-890 (1951). (Levinson) 13-652.

On perturbations of the continuous spectrum of the harmonic oscillator. *Amer. J. Math.* 74, 79-85 (1952). (Coddington) 14-473.

On the embedding of hyperbolic line elements; a correction. *Amer. J. Math.* 74, 264 (1952). (Fialkow) 13-683.

An inequality for the amplitudes and areas in vibration diagrams of time-dependent frequency. *Quart. Appl. Math.* 10, 175-176 (1952). (Levinson) 14-170.

On the maxima of the Patterson functions. *Physical Rev.* (2) 81, 271-273 (1951). (Boas) 12-495.

On the behavior of Fourier sine transforms near the origin. *Proc. Amer. Math. Soc.* 2, 398-400 (1951). (Cooper) 13-30.

On geodesic torsions and parabolic and asymptotic curves. *Amer. J. Math.* 74, 607-625 (1952). (Allendoerfer) 14-406.

On the theory of geodesic fields. *Amer. J. Math.* 74, 626-644 (1952). (Allendoerfer) 14-406.

On the hyperbolic partial differential equations. *Amer. J. Math.* 74, 834-864 (1952). (Pinl) 14-475.

On the behavior of the solutions of real binary differential systems at singular points. *Amer. J. Math.* 75, 117-126 (1953). (Reuter) 14-645.

On the curvatures of a surface. *Amer. J. Math.* 75, 127-141 (1953). (Allendoerfer) 14-583.

Envelopes and discriminant curves. *Amer. J. Math.* 75, 142-158 (1953). (Allendoerfer) 14-582.

On the existence of Riemannian manifolds which cannot carry non-constant analytic or harmonic functions in the small. *Amer. J. Math.* 75, 260-276 (1953). (Lichnerowicz) 14-1015.

On the singularities in nets of curves defined by differential equations. *Amer. J. Math.* 75, 277-297 (1953). (Reuter) 14-1014.

On the third fundamental form of a surface. *Amer. J. Math.* 75, 298-334 (1953). (Busemann) 14-1119.

On the local behavior of solutions of non-parabolic partial differential equations. *Amer. J. Math.* 75, 449-476 (1953). (A. Douglis) 15-318.

- On pieces of convex surfaces. *Amer. J. Math.* 75, 477-487 (1953). (Busemann) 15-150.
- On asymptotic parametrizations. *Amer. J. Math.* 75, 488-496 (1953). (Fialkow) 15-252.
- On the inverse of the parabolic differential operator $\partial^2/\partial x^2 - \partial/\partial t$. *Amer. J. Math.* 75, 598-610 (1953). (Dressel) 15-227.
- On elliptic Monge-Ampère equations. *Amer. J. Math.* 75, 611-620 (1953). (Busemann) 15-129.
- On non-oscillatory linear differential equations. *Amer. J. Math.* 75, 717-730 (1953). (Leighton) 15-527.
- Linear differential and difference equations with monotone solutions. *Amer. J. Math.* 75, 731-743 (1953). (Bellman) 15-221.
- On sine series with monotone coefficients. *J. London Math. Soc.* 28, 102-104 (1953). (Cooper) 14-553.
- On parabolic curves on surfaces. *Amer. J. Math.* 76, 81-86 (1954). (Allendoerfer) 15-553.
- On continuous area-preserving and Legendre transformations. *Amer. J. Math.* 76, 87-96 (1954). (Busemann) 15-411.
- Linear differential equations with completely monotone solutions. *Amer. J. Math.* 76, 199-206 (1954). (Bellman) 15-527.
- On non-oscillatory linear differential equations with monotone coefficients. *Amer. J. Math.* 76, 207-219 (1954). (Bellman) 15-527.
- On the local behavior of solutions of non-parabolic partial differential equations. II. The uniqueness of the Green singularity. *Amer. J. Math.* 76, 351-361 (1954). (Douglis) 16-256.
- On curves defined by binary non-conservative differential systems. *Amer. J. Math.* 76, 497-501 (1954). (Leighton) 15-956.
- Umbilical points and W-surfaces. *Amer. J. Math.* 76, 502-508 (1954). (Chern) 16-68.
- On monotone solutions of systems of non-linear differential equations. *Amer. J. Math.* 76, 860-866 (1954). (Scorza Dragoni) 16-246.
- The spectra of Toeplitz's matrices. *Amer. J. Math.* 76, 867-882 (1954). (F. W. Schäfke) 17-499.
- On the solutions of certain overdetermined systems of partial differential equations. *Arch. Math.* 5, 168-174 (1954). (Douglis) 16-703.
- On the conformal maps defined by Lagrange's series and by solutions of $dw/dz=f(w)$. *Rend. Circ. Mat. Palermo* (2) 3, 282-292 (1954). (Markus) 16-461.
- Asymptotic integrations of linear differential equations. *Amer. J. Math.* 77, 45-86; errata, 404, 932 (1955). (Kazarinoff) 16-590.
- On uniform Dini conditions in the theory of linear partial differential equations of elliptic type. *Amer. J. Math.* 77, 329-354 (1955). (Nirenberg) 17-627.
- On the local behavior of solutions of non-parabolic partial differential equations. III. Approximations by spherical harmonics. *Amer. J. Math.* 77, 453-474 (1955). (A. Douglis) 17-855.
- On the assignment of asymptotic values for the solutions of linear differential equations of linear differential equations of second order. *Amer. J. Math.* 77, 475-483 (1955). (F. V. Atkinson) 17-36.
- Asymptotic integrations of ordinary non-linear differential equations. *Amer. J. Math.* 77 (1955), 692-724. (L. Cesari) 17-485.

Lois de distribution des fonctions sommatoires dans la mécanique statistique. *C. R. (Doklady) Acad. Sci. URSS (N. S.)* 34, 55-57 (1942). 4-208.
Matematičeskie Osnovaniya Statističeskoj Mehaniki. [Mathematical Principles of Statistical Mechanics]. OGIZ, Moscow-Leningrad, 1943. 128 pp. (Russian) (Doob) 8-187.
Les fonctions convexes et les théorèmes d'évolution de la mécanique statistique. *Bull. Acad. Sci. URSS. Sér. Math.*

[Izvestia Akad. Nauk SSSR] 7, 111-122 (1943). (Russian. French summary) 5-167.

Sur le problème ergodique de la mécanique quantique. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 7, 167-184 (1943). (Russian. French summary) (Doob) 5-280.

Sur un cas de corrélation a posteriori. Rec. Math. [Mat. Sbornik] N. S. 12(54), 185-195 (1943). (French. Russian summary) (Koopman) 5-168.

Sur le problème de Tchebycheff. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 10, 281-294 (1946). (Russian. French summary) (Mahler) 8-444.

Tri Žemčuziny Teorii Čisel. [Three Pearls of the Theory of Numbers]. OGIZ, Moscow-Leningrad, 1947. 72 pp. 11-83.

Deux théorèmes liés au problème de Tchebycheff. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 11, 105-110 (1947). (Russian. French summary) (Mahler) 9-10.

On a limiting case of Kronecker's approximation theorem. Doklady Akad. Nauk SSSR (N. S.) 56, 563-565 (1947). (Russian) (Mahler) 9-227.

On some general theorems of the theory of linear Diophantine approximations. Doklady Akad. Nauk SSSR (N. S.) 56, 679-681 (1947). (Russian) (Mahler) 9-227.

A transfer theorem for singular systems of linear equations. Doklady Akad. Nauk SSSR (N. S.) 59, 217-218 (1948). (Russian) (Mahler) 9-334.

On the theory of linear Diophantine approximations. Doklady Akad. Nauk SSSR (N. S.) 59, 865-867 (1948). (Russian) (Mahler) 9-412.

A quantitative formulation of the approximation theory of Kronecker. Izvestiya Akad. Nauk SSSR. Ser. Mat. 12, 113-122 (1948). (Russian) (Dyson) 9-569.

Regular systems of linear equations and a general problem of Čebyšev. Izvestiya Akad. Nauk SSSR. Ser. Mat. 12, 249-258 (1948). (Russian) (Dyson) 10-18.

Dirichlet's principle in the theory of Diophantine approximations. Uspehi Matem. Nauk (N. S.) 3, no. 3(25), 3-28 (1948). (Russian) (Dyson) 10-102.

On some applications of the method of the additional variable. Uspehi Matem. Nauk (N. S.) 3, no. 6(28), 188-200 (1948). (Russian) (Dyson) 10-512.

Mathematical Foundations of Statistical Mechanics. Translated by G. Gamow. Dover Publications, Inc., New York, N. Y., 1949. viii + 179 pp. (Doob) 10-666.

Cepnye drobi. [Continued Fractions]. 2d ed. Gosudarstv. Izdat. Tehn.-Teor. Lit., Moscow-Leningrad, 1949. 116 pp. (Davenport) 13-444.

On the fractional parts of a linear form. Izvestiya Akad. Nauk SSSR. Ser. Mat. 13, 3-8 (1949). (Russian) (Dyson) 10-512.

The simplest linear continuum. Uspehi Matem. Nauk (N. S.) 4, no. 2(30), 180-197 (1949). (Russian) (Heyting) 11-2.

On some applications of the method of the additional variable. Amer. Math. Soc. Translation no. 18, 14 pp. (1950). 12-12.

On the analytical apparatus of physical statistics. Trudy Mat. Inst. Steklov. 33, ii + 54 pp. (1950). (Russian) (Doob) 13-416.

On sums of positive random variables. Doklady Akad. Nauk SSSR (N. S.) 71, 1037-1039 (1950). (Russian) (Wolfowitz) 11-605.

Limit theorems for sums of positive random quantities. Ukrain. Mat. Žurnal 2, no. 4, 3-17 (1950). (Russian) (Doob) 14-60.

Statistical mechanics as a problem of the theory of probability. Uspehi Matem. Nauk (N. S.) 5, no. 3(37), 3-46 (1950). (Russian) (Doob) 12-68.

Drei Perlen der Zahlentheorie. Akademie-Verlag. Berlin, 1951. 62 pp. 13-13.

Matematicheskie osnovaniya kvantovoi statistiki. [Mathematical foundations of quantum statistics.] Gosudarstv. Izdat. Tehn.-Teor. Lit., Moscow-Leningrad, 1951. 256 pp. (Doob) 13-894.

On some general theorems of statistical physics. Trudy Mat. Inst. Steklov., v. 38, pp. 345-365. Izdat. Akad. Nauk SSSR, Moscow, 1951. (Russian) (Doob) 13-895.

The simplest linear continuum Časopis Pěst. Mat. 76, 158-174 (1951). (Czech) 14-234.

On the distribution laws of the "occupation numbers" in quantum statistics. Doklady Akad. Nauk SSSR (N. S.) 78, 461-463 (1951). (Russian) (Doob) 13-417.

Three pearls of number theory. Graylock Press, Rochester, N. Y., 1952. 64 pp. 13-724.

Retězové zlomky. [Continued fractions.] Příkladovědecké Vydavatelství, Praha, 1952. 104 pp. 15-203.

On classes of equivalent events. Doklady Akad. Nauk SSSR (N. S.) 85, 713-714 (1952). (Russian) (Doob) 14-293.

Kralkikurs matematičeskogo analiza. [A short course of mathematical analysis.] Gosudarstv. Izdat. Tehn.-Teor. Lit., Moscow, 1953. 624 pp. 16-224.

The concept of entropy in the theory of probability. Uspehi Matem. Nauk (N. S.) 8, no. 3(55), 3-20 (1953). (Russian) (Doob) 15-238.

The notion of entropy in the calculus of probabilities. Acad. Repub. Pop. Romîne. An. Romîno-Soviet. Mat.-Fiz. (3) 7, no. 2(9), 32-49 (1954). (Romanian) 16-268.

Matematicheskie metody teorii massovogo obsluživaniya. [Mathematical methods of the theory of mass service.] Trudy Mat. Inst. Steklov. v. 49. Izdat. Akad. Nauk SSSR, Moscow, 1955, 122 pp. (J. L. Doob) 17-276.

Symmetric functions on multidimensional surfaces. Pamyati Aleksandra Aleksandroviča Andronova [In memory of Aleksandr Aleksandrovič Andronov], pp. 541-574. Izdat. Akad. Nauk SSSR, Moscow, 1955. (J. L. Doob) 17-567.

Kettenbrüche. B. G. Teubner Verlagsgesellschaft, Leipzig, 1956. vi + 96 pp. 18-274.

Mathematische Grundlagen der Quantenstatistik. Akademie-Verlag, Berlin, 1956. ii + 200 pp. 18-443.

On the fundamental theorems of information theory.

Translated by Morris D. Friedman, 572 California St., Newtonville 60, Mass., 1956. 84 pp. 18-630.

Nachwirkungsfreie Folgen von Zufälligen Ereignissen. Teor. Veroyatnost. i Primenen. 1 (1956), 3-18. (Russian. German summary) (E. Lukacs) 19-328.

Über Poissonsche Folgen zufälliger Ereignisse. Teor. Veroyatnost. i Primenen. 1 (1956), 320-327. (Russian. German summary) (E. Lukacs) 19-328.

On the basic theorems of information theory. Uspehi Mat. Nauk (N. S.) 11 (1956), no. 1 (67), 17-75. (Russian) (J. L. Doob) 17-1098.

Mathematical foundations of information theory. Translated by R. A. Silverman and M. D. Friedman. Dover Publications, Inc., New York, N. Y., 1957. ii + 120 pp. 19-1148.
